2. Information disclosure and inquiring

Changes to the information disclosure and inquiring place

Applicable Inapplicable

Please refer to the 2020 annual report for the newspapers and websites where the Company's information is disclosed. The inquiry address of the interim report has remained unchanged during the report period.

4. Financial Highlight

Whether the Company needs to make retroactive adjustment or restatement of financial data of previous years

Yes No

Retroactive adjustment or restatement

Consolidation of entities under common control

	This report period	Same period last year		Year-on-year change (%)
		Before adjustment	After adjustment	After adjustment
Turnover (yuan)	1,568,778,834.98	1,251,608,064.42	1,256,258,223.01	24.88%
Net profit attributable to shareholders of the listed company (yuan)	111,488,701.33	146,839,884.57	147,784,781.12	-24.56%
Net profit attributable to the shareholders of the listed company and after deducting of non-recurring gain/loss (yuan)	97,095,794.95	146,292,847.94	146,292,847.94	-33.63%
Net cash flow generated by business operation (yuan)	-500,924,545.00	-136,985,479.40	-138,927,264.32	-260.57%
Basic earnings per share (yuan/share)	0.10	0.13	0.13	-23.08%
Diluted Earnings per share (yuan/share)	0.10	0.13	0.13	-23.08%
Weighted average net income/asset ratio	2.05%	2.81%	2.82%	-0.77%
	End of the report period	End of last year		Year-on-year change
		Before adjustment	After adjustment	After adjustment
Total asset (yuan)	11,721,210,311.06	11,866,857,250.39	11,891,460,320.08	-1.43%
Net profit attributable to the shareholders of the listed company (RMB)	5,503,070,436.51	5,380,857,155.39	5,392,378,856.43	2.05%

Note: (1) the net profit attributable to the shareholders of the listed company in the reporting period decreased by 24.56% compared with the same period of last year, mainly due to the change of accounting estimates according to the expected credit loss rate of accounts receivable and contract assets in the same period of last year, resulting in an increase of RMB80.7396 million in the net profit in the same period of last year; After deducting the impact, the net profit attributable to the shareholders of the listed company in the reporting period increased by 66.29% over the same period of last year.

(2) The net cash flow from operating activities in the reporting period decreased by 260.57% compared with the same period of last year, mainly due to the decrease of cash flow from operating activities compared with the same period of last year due to the settlement and payment of land value-added tax of RMB349,316,800 yuan in the reporting period of Shenzhen Fangda Town project of real estate business.

5. Differences in accounting data under domestic and foreign accounting standards

1. Differences in net profits and assets in financial statements disclosed according to the international and Chinese account standards

Applicable Inapplicable

There is no difference in net profits and assets in financial statements disclosed according to the international and Chinese account standards during the report period.

2. Differences in net profits and assets in financial statements disclosed according to the overseas and Chinese account standards

Applicable Inapplicable

There is no difference in net profits and assets in financial statements disclosed according to the international and Chinese account standards during the report period.

6. Accidental gain/loss item and amount

Applicable Inapplicable

In RMB

Item	Amount	Notes
Non-current asset disposal gain/loss (including the write-off part for which assets impairment provision is made)	-2,027,304.03	
Subsidies accounted into the current income account (except the government subsidy closely related to the enterprise's business and based on unified national standard quota)	3,563,846.25	
Net gain between the beginning and merger day of subsidiaries generated by merger of companies under common control	17,512.89	
Gain/loss from change of fair value of transactional financial asset and liabilities, and investment gains from disposal of transactional and derivative financial assets and liabilities and sellable financial assets, other than valid period value instruments	3,102,080.16	

related to the Company' s common businesses		
Write-back of impairment provision of receivables and contract assets for which impairment test is performed individually	14,600,000.00	
Other non-business income and expenditures other than the above	-2,279,268.05	
Less: Influenced amount of income tax	2,384,080.04	
Influenced amount of minority shareholders' equity (after-tax)	199,880.80	
Total	14,392,906.38	--

Explanation statement should be made for accidental gain/loss items defined and accidental gain/loss items defined as regular gain/loss items according to the Explanation Announcement of Information Disclosure No. 1 - Non-recurring gain/loss mentioned.

Applicable Inapplicable

No circumstance that should be defined as recurrent profit and loss according to Explanation Announcement of Information Disclosure No. 1 - Non-recurring gain/loss occurs in the report period.

Chapter 3 Management Discussion and Analysis

1. Major businesses of the Company during the report period

Headquartered in Nanshan District, Shenzhen, the Company's B shares and A shares were listed on the Main Board of Shenzhen Stock Exchange in November 1995 and April 1996 respectively. Currently, seven major business subsidiaries of the Company are national high-tech enterprises with modern production bases in Shanghai, Chengdu, Nanchang, and Dongguan respectively. Adhering to the green, low-carbon and environmental protection industry, the Company successively opened up high-end curtain wall, solar photovoltaic (BIPV) curtain wall, PVDF aluminum veneer, rail transit PSD system and other industries in China in 1992. Over the past 30 years since its establishment, the Company has adhered to the tenet of science and technology and innovation as the source, forged Fangda craftsman spirit in the pursuit of excellent quality, and built Fangda smart curtain wall, Fangda PVDF aluminum veneer, Fangda rail transit PSD system and other products into a global industry benchmark brand.

In the first half of 2021, the environment at home and abroad remained complex with uncertain and unstable factors, especially the continuous rise of commodity prices, which led to the rise of enterprise costs. COVID-19 was complex and perplexing. It still did not end, and brought great difficulties and challenges to the production and operation of enterprises. Under the leadership of the Board of Directors and through the joint efforts of all employees, the Company has basically completed the business objectives for the first half of 2021. During the reporting period, the Company realized an operating revenue of RMB1,568,778,800 yuan, an increase of 24.88% over the same period of last year; The net profit attributable to the owner of the parent company was RMB111,488,700 yuan, a decrease of 24.56% over the same period of last year. The decrease was mainly due to the change of accounting estimates according to the expected credit loss rate of accounts receivable and contract assets in the same period of last year, resulting in an increase of RMB80,739,600 yuan in the same period of last year. After deducting the impact, the net profit attributable to shareholders of the listed company for the reporting period increased by 66.29% over the same period of the previous year. As of the end of the reporting period, the Company's order reserve was RMB6,264,186,100 (excluding presales of real estate), an increase of 30.26% from the same period of the previous year, which was 3.99 of the Company's operating revenue in 2021 H1. Sufficient order reserve provides a strong guarantee for the high-quality development of the Company.

1. Smart curtain wall system and material industry

(1) Industry development

After years of development, especially the rapid development in the 1990s, by the beginning of the 21st century, China has become the world's largest curtain wall production and use country. With the further promotion of the national regional coordinated development strategy, development plans such as new urbanization, coordinated development of Beijing-Tianjin-Hebei, "One Belt One Road" initiative, Guangdong-Hong Kong-Macao Greater Bay Area construction, Shenzhen Pilot Demonstration Zone, etc., as well as new materials, new technologies, and new have brought new opportunities for the development of curtain wall industry. With the development of the industry, the competition in the curtain wall industry will intensify and show a significant differentiation trend. As the industry leader, the market share will be continuously improved.

The ninth meeting of the Central Finance and Economics Committee on March 15, 2021 pointed out that carbon peaking and carbon neutrality should be incorporated into the overall layout of ecological civilization construction, and strive to achieve the goal of carbon peaking by 2030 and carbon neutrality by 2060. The Ministry of Housing and Urban-Rural Development is also accelerating the transformation and upgrading of the construction industry and the green development of urban and rural construction. The construction industry needs to realize energy saving and emission reduction from the source. As one of the main technical routes of photovoltaic buildings, BIPV has attracted more and more attention from the industry and the market,

and photovoltaic curtain walls are expected to be applied to more buildings. The Company began to invest in the research and development of BIPV products in 2002, and has mastered a number of patented technologies with strong competitiveness. The products entered the market in 2003.

(2) Main products and purpose

Curtain wall is one of the exterior wall enclosure systems of various buildings (structures). It has the characteristics of light weight, convenient maintenance and beautiful appearance. It is widely used in modern large buildings, high-rise buildings and industrial buildings. The Company's main products include smart curtain walls, BIPV curtain walls, LED color-display curtain walls, PVDF aluminum plate, graphene aluminum plate, and Nano aluminum plate materials.

(3) Operation mode

The Company mainly obtains contract orders through bidding. Its business model is the whole industry chain, from design, process, material procurement, production and processing, to construction, installation and after-sales service. The main risk of this mode is that it takes a long period of time from the completion of the order to the completion of the project, and it is highly dependent on raw materials and labor costs. It is greatly affected by raw material prices, and labor market fluctuations. Different contract orders have different requirements, imposing high requirements on technology and production management. The main business model has not changed during the reporting period.

(4) Market position

Over the past more than 30 years, the Company has undertaken hundreds of large projects and received the highest award in the industry China Construction Luban Award and Zhan Tianyou Civil Engineering Award for many times. The Company has also received nearly 100 provincial and above awards. Fangda Curtain Wall brand has strong technical advantages and competitiveness in the industry. It has successively participated in the preparation of more than 10 national or industrial standards such as energy efficiency design standards for public buildings, obtained 496 patents and 13 copyrights, and created 9 new records for Chinese enterprises. The Company has a Class A qualification for building curtain wall engineering contracting and class A qualification for building curtain wall engineering design. It is the highest level for curtain wall design and construction companies in China.

(5) Main business drive

1) Relying on the product quality, technical strength and brand influence with core competitiveness, the Company has achieved remarkable results in market development, and new orders in the reporting period have reached a new high in the same period.

During the reporting period, the Company successively won the bid or signed contracts for Shenzhen Tianyin building, Shenzhen Huaqiang Creative Industry Park Phase VI, Shenzhen Kingdee Software Park Phase II, Shenzhen Nanshan District Science and Technology Center (bid section IV), Shenzhen Dapeng New Area People's Hospital, Shenzhen Kangtai group building, Shenzhen Hanyuan Mingyuan hospital, Guangzhou Vanke Expo site 6, Guangzhou Hongding Plaza, Dongguan oppo Chang'an center Wuhan Hubei Radio and television media building, Foshan Shunde Rural Commercial Bank headquarters building, Shanghai xihongqiao business district xujingzhong plot 29-02 (a) office and commerce, Nanjing Huamao International Center project, Ningbo Hangzhou Bay Haiquanwan project 1#-3, 2#-1 plot, Wuxi Jingjiang Wanke bid section II, Xi'an Wanda • Xi'an one project plot 2, Xi'an Qujiang cultural innovation center A large number of smart curtain wall system and material projects, such as bid section I of Kunming Wujiaba Huanchen Business Center (30# plot), domain house apartment in Melbourne, Australia, and IGLU student adaptation project in Melbourne, won the bid and signed new orders with a total amount of RMB2,580,154,200 yuan, an increase of 72.09% over the same period of last year. By the end of the reporting period, the Company's order reserve of curtain wall system and materials industry was RMB4,566,406,400 yuan, an increase of 44.11% over the same period of the previous year, which was 4.16 times the operating revenue of curtain wall system and materials industry in the first half of 2021, laying a solid foundation for the sustainable and healthy development of the Company. During the reporting period, the Company's curtain wall system and materials industry realized an operating revenue of RMB109,171,000 yuan, an increase of 29.64% over the same period of last year.

2) During the reporting period, the Company actively explored high-quality development paths such as technological

innovation, management reform and intelligent manufacturing, made full use of advanced technologies such as Internet, big data, 5G, robot and BIM, built intelligent factories and intelligent operation systems, promoted the transformation from "manufacturing" to "intelligent manufacturing", and achieved a series of results. The Company's "unit-type porcelain panel curtain wall" technology with independent intellectual property rights was selected into the 19th "Shenzhen Enterprise Innovation Record". This invention patent makes the installation of porcelain panel curtain walls simple and safe and reduces engineering costs. This core technology is used in the construction curtain wall industry. China is at the leading level, and promotes the construction curtain wall industry to continue to advance in the direction of new fabricated curtain walls. The four curtain wall projects of Shenzhen Qianhai International Conference Center, Shenzhen Guanze Financial Center, Shenzhen Bay Science and Technology Innovation Center, and Shenzhen Baoan Binhai Cultural Park Haifu Ecological Building undertaken by the Company won the "2020 Shenzhen Decoration Engineering Golden Peng Award"; Fang Da Jianke General Manager Wei Yuexing was listed in the "2020 Guangdong-Hong Kong-Macao Greater Bay Area Enterprise Innovation List-Innovative Outstanding Persons List".

2. Rail transport screen door business

(1) Industry development

On February 24, 2021, the Central Committee of the Communist Party of China and the State Council issued the "National Comprehensive Three-dimensional Transportation Network Planning Outline" (hereinafter referred to as the "Outline"), which is the first time to determine the national medium and long-term transportation network planning and construction requirements. The "Outline" pointed out that to promote the integrated development of transportation within the urban agglomeration. Build a convenient and efficient intercity transportation network, accelerate the networking of urban agglomeration rail transit, improve the urban agglomeration expressway network, strengthen the smooth connection between roads and tracks in urban junction areas, and basically realize the two-hour traffic circle within the urban agglomeration. According to statistics from the China Urban Rail Transit Association, as of June 30, 2021, a total of 49 cities in mainland China have opened 8,448.67 kilometers of urban rail transit operating lines. In the first half of 2021, Luoyang, Jiaying, Shaoxing and Nanping will be added as four urban rail transit operation cities, and another 14 cities will have new lines or sections opened for operation. In the first half of 2021, a total of 478.97 km of new urban rail transit lines were added, an increase of 164% over 181.42 km in the same period last year; A total of 18 new operation lines are added, including 4 new extension sections or rear access sections. It is expected that in the second half of 2021, one new urban rail transit operation city will be added, with a new operation line length of about 700 km. Urban rail transit is an important aspect of urban construction and is expected to maintain a rapid development trend.

(2) Main products and purpose

Metro screen door is a system installed on the side edge of the subway platform near the track to separate the platform area from the track area. It has the functions of safety, energy saving and environmental protection. Metro PSD system is composed of signal, software, DCU, transmission system, gantry crane, door body and other components. Since 1999, the Company has taken the lead in successfully developing Metro PSD system in China. It is one of the few enterprises in the industry that have passed the international railway iris system certification.

(3) Operation mode

The Company has built a complete industry chain that integrates R&D, designing, manufacturing, engineering and technical services. The Company obtains contract orders through bidding, carries out design, process treatment, procurement of raw materials, production and installation, and provides technical maintenance services according to the orders. In terms of quality assurance, the Company has passed ISO9001, ISO14000 and international railway iris system certification. The business model has not changed during the reporting period.

(4) Market position

As a "pioneer" and leader in the domestic rail transit screen door system industry, after more than 20 years of development, the Company has successively constructed subway screens in Beijing, Shanghai, Tianjin, Guangzhou, Shenzhen, Nanjing, Shenyang, Wuhan, Xi'an, Fuzhou, Nanchang and other cities. The door system has a coverage rate of more than 70% in the domestic cities that have opened subway operations, and the market share steadily ranks first. In addition, the Company's products have been

continuously promoted to overseas markets, and many projects have been won in countries and regions along the “Belt and Road” such as Singapore, India, Malaysia, Thailand, Hong Kong and Taiwan. At present, the Fangda screen door system has been applied in the rail transit of 42 cities around the world. More than twenty million people use the Fangda screen door system every day. The Company has become the world's leading manufacturer and supplier of screen door systems in the world.

(5) Main business drive

With its competitive advantages in technology, service, brand and market, the Company continued to maintain a high order reserve during the reporting period. During the reporting period, the Company obtained orders for PSD system projects such as Mumbai Metro Line 4, Qingdao Metro Line 4 and Nanchang Metro Line 4 phase I, as well as professional technical maintenance service orders for PSD projects such as Wuhan Metro Line 2, line 3, South extension of line 7, east section of line 11, Xiamen Metro Line 1, Dongguan Rail Transit Line 2 and Nanjing Metro Line 1. By the end of the reporting period, the order reserve of the Company's rail transit PSD equipment industry had reached RMB1,697,779,800 yuan, an increase of 3.57% over the same period of the previous year, and the order reserve was 6.34 times the operating revenue in the first half of 2021. During the reporting period, the operating revenue of Metro PSD system was RMB267.687 million yuan.

Thanks to the good reputation of the Company's rail transit PSD project in Singapore, Malaysia, Thailand, India, Hong Kong, Taipei and other places, the recognition of Fangda PSD system with independent core technology in the international market has further improved, and the brand influence has continued to improve. During the reporting period, the Company overcame the impact of overseas epidemic, realized overseas business sales revenue of RMB50,738,300 yuan, a year-on-year increase of 221.46%, accounting for 18.95% of the sales revenue of the industry, forming a new pattern of dual cycle development of domestic and international business. In the future, the Company will continue to make efforts in the overseas market and further expand its business territory in the overseas market. The overseas business sales revenue of the Company's rail transit PSD system is expected to further increase.

During the reporting period, the east section and phase II of Shijiazhuang Metro Line 3, Guiyang Metro Line 2 and Jinan Metro Line R2 with Fangda rail transit PSD system were successfully opened and operated, further increasing the brand influence. With the end of the free maintenance period of more and more rail transit screen doors, the professional demand for technical maintenance services of rail transit screen door system continues to grow. During the reporting period, the Company realized a technical maintenance service revenue of RMB23,973,400 yuan, an increase of 56.96% over the same period of last year. The Company has obtained the whole industry chain technology of Metro PSD and professional product supporting services. The added value of technical maintenance services is high, and the business will continue to grow in the future.

During the reporting period, the Company was rated as "excellent equipment manufacturer provided by Party A", "advanced outsourcing unit" and "excellent maintenance unit" by many subway companies. It also received letters of thanks from Xi'an Subway, Lanzhou Subway and Zhengzhou Subway. During the reporting period, the Company's "platform automatic telescopic pedal" technology won the 19th "Shenzhen enterprise innovation record" and Fangda Zhichuang won the "2020 Guangdong, Hong Kong and Macao Great Bay enterprise innovation list - innovation achievement list". The Company has won wide praise in the urban rail transit industry with high-quality, efficient and professional technical services, fully affirmed the Company's advanced technology and product quality in the field of urban rail transit PSD equipment.

3. New energy industry

The Company has been practicing the concepts of low-carbon, energy-saving, green and environmental protection. It is one of the earliest companies in China that independently mastered and possessed independent intellectual property rights to engage in the design, manufacturing and integration of solar photovoltaic systems. The Company completed China's first integrated photovoltaic (BIPV) project in 2003. Since 2016, it has completed the distributed solar photovoltaic power station in Xuanfeng Town, Pingxiang, Jiangxi, and the parking awning (BIPV) of Jiangxi Isuzu Motor Co., Ltd. in Nanchang, the grid-connected power generation project such as the roof of the Songshan Lake factory building (BIPV) in Dongguan and the wall surface of the Nanjing Jiangsu Bank Building (BIPV), realizing the power generation of the building. During

the reporting period, the clean energy produced by the Company's solar photovoltaic power plants was equivalent to reducing carbon dioxide emissions by nearly 10,000 tons, contributing to the realization of the Country's carbon peak and carbon neutral goals.

4. Real estate

(1) Changes in the macroeconomic situation and industry policy environment, the status of industry development and policy situation in the city where the Company's main projects

In the first half of 2021, the overall operation trend of the real estate market continued at the end of last year, and the central and local governments intensively issued regulatory policies to stabilize market expectations. China's economy has entered a high-quality development stage, real estate has changed from quantity to quality, and real estate in first tier cities and metropolitan cities has developed steadily.

The main project location of the Company is Shenzhen. Shenzhen is located in the core area of Guangdong, Hong Kong and Macao. The Company will focus on the development of urban renewal and renovation projects in Shenzhen.

At present, the remaining 6.50% of Shenzhen Fangda Town project is being gradually liquidated, and the rental rate of self-owned office building properties of the project has reached 73.74%. Nanchang Fangda Center project is selling rental products according to the rhythm of project marketing.

(2) The Company's main business model, business project format, real estate sales in the city where the main project is located, market position and competitive advantages of listed companies, main risks and countermeasures

The Company's real estate business mainly adopts the business model of self-development, partial sales and partial self-supporting. At present, the Company mainly develops, sells and rents office, commercial and apartment products. The Company has established a professional team to operate and manage the Company's commercial and property.

The Company's real estate projects are in Shenzhen and Nanchang. According to the statistics of World Bank, in the first half of 2021, the supply area of office buildings in Shenzhen was 309,800 square meters, and the transaction area was 241,100 square meters. The supply increased year-on-year, and the transaction volume decreased slightly; According to the statistics of Jiangxi E-House Research Center, in the first half of 2021, the supply of commercial housing in Nanchang was about 1.84 million square meters, with a filing area of 2.33 million square meters.

The sales and rental rate of Shenzhen fangdacheng project is fast, which is highly recognized by the Shenzhen market.

The Company's Fangda Center project is located in Nanchang Honggutan, which has obvious geographical advantages and good market expectations. However, due to the large inventory of commercial office buildings in Nanchang and the downward trend of volume and price, the sales has slowed down.

(3) New land reserve projects

Parcel or project name	Land location	Purpose	Land area (m ²)	Building area (m ²)	Obtaining method	Interests percentage	Total land price (ten thousand yuan)	Equity consideration (ten thousand yuan)

(10) Development strategy and operation plan in next year

It is expected that the market regulation of the real estate market will remain tight in 2021, the differentiation of different cities will continue, and the transactions of the first tier and some second tier markets are expected to keep increasing. The Company is still optimistic about the future development of real estate in core cities and core areas. In the future, the Company will continue to expand the brand effect, deepen the product types, deepen the local market, and effectively improve the Company's operating performance.

In 2021 H2, the main task of the Company's real estate sector is to realize the sales of Shenzhen Fangda Town project, and focus on promoting the sales and leasing of Nanchang Fangda Town center project.

In 2021, the Company will actively promote the application of Fangda Bangshen project and Henggang Dakang project according to the latest policies of Shenzhen.

(11) Bank mortgage loan guarantee provided for commercial housing purchasers

II. Core Competitiveness Analysis

(1) Smart curtain wall system and material

1. Expertise and brand competitiveness

As the world's top smart curtain wall system supplier and service provider, the Company has independently developed and mastered core technologies. The average annual R&D and innovation investment is about 5% of sales revenue. It has been selected as one of the "Top 500 Chinese Listed Companies Innovation Index" for three years. In the same industry across the country, the Company is the earliest to establish R&D institutions such as corporate postdoctoral workstations, engineering technology centers, and curtain wall research and design institutes. Founded 30 years ago, it has undertaken thousands of major curtain wall system projects in more than 100 countries and regions. For example, in 2020, it undertook the Shenzhen Special Economic Zone 40th Anniversary Celebration Conference venue-Shenzhen Qianhai International Conference Center's smart curtain wall project, 2018 General Secretary Xi Jinping visited Shenzhen Museum of Contemporary Art and Urban Planning Exhibition Hall and Vanke Qianhai Corporate Mansion's curtain wall system, the curtain wall system of the Xiamen International Conference Center, the venue of the 2017 Xiamen BRICS Summit, the 2014 APEC Summit, the curtain wall system of the 2017 "One Belt One Road" Beijing Yanqi Lake International Conference Capital, the main venue of the International Cooperation Summit Forum, has won wide acclaim from all walks of life. The industry and target market of the Company have high requirements for the performance of participating enterprises which has formed certain thresholds. Especially in the super high-rise buildings, large public buildings and special-shaped external maintenance structures, the Company has rich experience in project implementation. It has established business contacts and cooperation with many large real estate development companies. The Company has a high reputation and strong market competitiveness.

The Company has created many firsts in the industry and is one of the high-end preferred brands in the Chinese smart curtain wall system materials industry. So far, four subsidiaries including Shenzhen Fangda Construction Technology Group Co., Ltd., Dongguan Fangda New Materials Co., Ltd., Chengdu Fangda Construction Technology Co., Ltd., Shanghai Fangda Zhijian Technology Co., Ltd., Fangda New Materials (Jiangxi) Co., Ltd. And Shenzhen Yunzhu Industrial Co., Ltd. have been recognized as hi-tech companies. The "FANGDA" trademark was recognized as a well-known trademark in China, and the "FANGDA" brand was awarded "International Reputation Brand", "Shenzhen Time-honored Brand", and "Shenzhen Famous Brand".

2. Location advantage

2021 is the first year of the "14th Five-Year Plan". Shenzhen will vigorously promote the construction of the Guangdong-Hong Kong-Macao Greater Bay Area and the Shenzhen Pilot Demonstration Zone "Dual Zone", implement comprehensive reform pilots in Shenzhen, and the implementation of the plan will directly stimulate the construction of large public buildings, and There is a large market demand for building curtain walls. Since its establishment in Shekou, Shenzhen in 1991, the Company has been based in Shenzhen for 30 years. It has been rated as "Guangdong Province Contract-abiding and Credit-Reliable Enterprise Company", "Guangdong Province Top 500 Manufacturing Enterprises", "Shenzhen Top 500 Enterprises", and Shenzhen Special Zone 40 Anniversary "50 Most Potential Listed Companies". The Company will continue to take advantage of the industry's regional leadership, grasp the policy dividend, and follow the national development strategy to promote the Company's rapid development.

3. Focusing on the high-end market to edge out competitors

In the fierce market competition, the Company accurately positions the market in the field of smart

energy-saving curtain wall systems with high requirements for technology, service and management, and focuses its resources on high-end curtain wall projects. Many of the curtain wall projects undertaken won the national "Luban Award", "Zhan Tianyou Civil Engineering Award", "National Quality Engineering Award", "China Construction Engineering Decoration Award", awards, and Won the title of "Top Ten Most Competitive in China's Curtain Wall Industry". The Company has built a leading brand and created a clear edge in the high-end curtain wall market.

4. Well-developed industry base landscape

In order for the Company to better serve the market and meet the growing demand for orders, after years of accumulation and continuous investment in hardware facilities, the Company's curtain wall system and material industry has been established nationwide with Shenzhen as its headquarters and Shanghai, Chengdu, Nanchang, and Dongguan as production bases, among which Dongguan Songshan Lake Base and Nanchang Base are one of the largest and most modern curtain wall system and material production bases in China and even the world. The Company's production base continues to increase digital and intelligent construction, introduces intelligent equipment, and uses Internet technology to track the Company's products and continuously improve efficiency. The layout of the production base provides an important guarantee for improving the market share and comprehensive competitiveness.

The Company's curtain wall system and material industry integrates R&D, design, production, project management and construction, with complete industrial supporting facilities, and has strong comprehensive strength in technology, cost advantages, quality and service.

5. Talent

The Company always adheres to the "people-oriented" talent concept, actively introduces and trains all kinds of professional technology and management talents, and is committed to building an efficient management and operation team. After years of development, the Company has an experienced senior management team and middle-level managers with strong execution ability, as well as a complete talent training system and talent reserve. This year, the Company continuously optimized the effective incentive and assessment system, implemented quantitative management, built a platform for industry university research integration with colleges and universities and scientific research institutions, promoted the cooperation between colleges and enterprises and the combination of industry and university, promoted the effective docking of talent cultivation and industrial demand, and ensured that the Company's scientific research strength in the field of smart curtain wall was at the leading level in the industry.

(2) Rail transport equipment business

1. Expertise competitiveness

Through continued independent innovation, the Company has developed the global leading metro screen door system with full intellectual property right and broken the monopoly of overseas competitors. The Company has also compiled the Rail Transport Station Screen Door Standard, which is the first of its kind in China. The standard was implemented as a national standard on March 1, 2007. As the first standard in the industry in China, the standard has played a key role in guiding the development of China's rail transport screen door industry and enabled the Company a dominant lead in the industry. In 2019, following the editor-in-chief of the Urban Rail Transit Platform Screen Door, the Company once again participated in the preparation of the Urban Rail Transit Energy Consumption and Emission Index Evaluation Method (GB / T 37420-2019) officially implemented it on December 1, 2019, highlighting the Company's technical strength and industry leader status in the field of urban rail transit. Fangda Zhichuang Technology Co., Ltd., a subsidiary of the Company engaged in metro platform screen door system industry of rail transit, is a state-level high-tech enterprise. During the reporting period, it was awarded the "2020 Guangdong Hong Kong Macao Great Bay District Enterprise Innovation Power List - Innovation Achievement List".

2. Brand competitiveness

Rail transit platform screen door is related to people's daily transportation, so the requirements for product safety, technology, quality and service ability are particularly high. In 1999, the Company began to take the lead in developing rail transit platform

screen door technology in China, accumulated rich experience, had the first mover advantage, and gradually grew into an excellent brand enterprise in the industry. Up to now, the Company has undertaken the construction projects of track screen doors in 42 cities and regions at home and abroad, including Shenzhen, Shanghai, Guangzhou, Wuhan, Hong Kong, Singapore, Kuala Lumpur, Malaysia, Noida, India and Bangkok, Thailand. The Fangda subway screen door system has grasped a leading market share and established incomparable brand influence thanks to its patents, standard and maintenance services. The Company has become a leading railway screen door supplier in the world. During the reporting period, the Company received 10 collective and individual honorary awards and 3 thank-you letters from urban rail transit construction units such as Shenzhen, Xiamen, Hohhot, Wuhan, Hangzhou, Nanchang, Nanning, Xi'an, Lanzhou and Zhengzhou.

3. Industry chain advantage

As China's first enterprise to enter the subway platform screen door, the Company has an overall solution industry chain of rail transit platform screen door integrating R & D, design, manufacturing, engineering construction and technical services. With years of accumulated reputation, leading technical services and independent intellectual property products, the Company has won the favor of the domestic and foreign rail transit platform screen door market, and the subway platform screen door of the Company has been widely used in China. The coverage rate of the cities with metro operation has reached more than 70%. With many domestic metro platform screen door systems entering the maintenance period, the Company actively expands the industrial chain and takes the lead in developing Metro maintenance business in China. The Company has a natural advantage in this high-end service industry. Our screen door system are independently developed by us, thus enabling us to provide prompt, overall, effective and standard maintenance services for our customers. With more and more metro operation, the performance contribution of the business will continue to improve.

(3) New energy industry

The Company's new energy industry mainly includes the development of new energy saving technologies such as solar photovoltaic application and photovoltaic building integration (BIPV). With more than ten years' experience in developing solar energy PV power generating curtain wall technology, the Company is the earliest company that masters the intelligent property right in the designing, production and integration of solar energy PV curtain wall systems and is a pioneer in the application of PV curtain wall technology.

Distributed solar power PV power generation is closely related to the Company's curtain wall business. Most distributed solar power PV systems are closely related to construction. Moreover, the Company has nearly 20 years' experience in electrical product integration. The Company also has more than 30 years' experience in construction management and has the level-1 construction curtain wall engineering qualification and electrical installation engineering qualification.

(4) Real Estate

1. The Company is located in the core area of Guangdong, Hong Kong and Macao, focusing on the development of urban renewal projects in Shenzhen. Benefiting from the dividend of Shenzhen's rapid economic development, it is expected that the Company's real estate business will contribute profits to the Company in the future.

2. Although the Company is a later comer in the industry, the Shenzhen Fangda Town project was quickly recognized by the market and the sales rate was faster. The Company's subordinate enterprises have been rated as "Shenzhen real estate development industry brand value enterprise" by Shenzhen Real Estate Industry Association for three consecutive years and "Shenzhen real estate development industry development potential enterprise" for two consecutive years.

X. Risks facing the Company and measures

1. Risks and Countermeasures of macroeconomic uncertainty and policy changes

The global economy is always faced with many uncertainties. In addition, emergencies such as the new coronavirus epidemic may also bring unpredictable risks to the overall economy. The main business sectors of the Company are closely related to the macro-economy and industry policies, and are greatly affected by the overall macro-economic development. If China's economy develops slowly or fluctuates periodically in the future, the reduction of fixed asset investment will affect the demand of public building curtain wall industry and rail transit equipment industry, which will have an adverse impact on the Company's future profitability. In view of the above risks, the Company will pay close attention to the changes of macro-economy and policy situation at home and abroad, timely adjust the Company's business strategy, and further enhance its market competitiveness, operation and management ability, so as to improve its anti risk ability.

2. Market risks and measures

As the overall designing and engineering quality continues improving in the domestic construction curtain wall industry, curtain wall products will become increasingly standard, intensifying the market competition. In addition, the market concentration of first- and second-tier cities will increase, and regional competition will become more intense. The Company will continue to adopt a prudent management policy, refined management, and technological innovations to reduce management costs and accelerate the return of funds. By constantly improving the scientific and technological content and added value of products, constantly expanding the scale and benefit advantages, build high barriers to competition and broaden the business moat. While consolidating the domestic market, the Company will step up the efforts in exploring overseas markets, thus elevating our competitiveness in global markets and improving our resistance to risks.

3. Management risks and measures

In recent years, with the Company's curtain wall and material system industry, rail transit screen door industry orders increasing year by year and the Company's real estate property sector increased, the Company's assets, business, personnel and other aspects have expanded significantly, the organizational structure and management system will tend to Due to the complexity, the Company may face the management risk of industrial

scale expansion. The Company will continue to improve the management mode, integrate business management, optimize the business flow, seeking to build a high-efficient and solid management team. We will introduce high-quality, professional technical and management talents in different fields to strengthen the Company's core competitiveness.

4. Production and operation risks and measures

The macro-economy and market demand have added to the fluctuation in prices of main raw materials and labor, affecting the Company's profitability and creating additional production and operation risks for the Company. The Company will make use of raw material futures products to hedge against the risk of large price fluctuations, actively strengthen the management of technology, process, production and market, and strive to reduce procurement and manufacturing costs, reduce the loss of raw materials, improve the automation and intelligence of production equipment, strengthen staff skills training, improve staff labor efficiency, and maintain the sustainable development of the Company.

5. Real estate industry risks and countermeasures

The real estate industry is obviously affected by the country's macro-control, and the Company needs to review the situation and further strengthen the forward-looking research on the economic situation, policies and industry situation, and the capital market, enhance predictive power, improve the control and resilience of risk factors, and timely adjust business strategies to adapt to the new economic normal and new changes in the real estate industry. At the same time, the Company will increase its efforts to eliminate the cash and ensure that the Company continues to maintain stable operation and healthy development by withdrawing cash.

Chapter IV Corporation Governance

There is no share incentive schemes, staff shareholding program or other incentive plans in the report period

V. Environmental and social responsibility

1. Environmental protection

Whether the Company and its subsidiaries are key polluting companies disclosed by the environmental protection authority

Yes No

Administrative penalties for environmental problems during the reporting period

Company or subsidiary	Reason	Violations	Punishment result	Impact on the production and operation of listed companies	Rectification measures of the Company
None	None	None	None	None	None

Refer to other environmental information disclosed by key pollutant discharge units

None

Reasons for non-disclosure of other environmental information

During the reporting period, the listed company and its subsidiaries were not key pollutant discharge units announced by the environmental protection department, and there were no administrative penalties for environmental problems.

2. Social responsibilities

As of the disclosure date of this report, the Company's funds for social public welfare undertakings in 2021 totaled RMB 3.222 million. Among them, the Company donated RMB3 million yuan to the education development foundation of Nanchang University for the construction, transformation and upgrading project of Nanchang University Library. At the same time, the Company actively responded to the national call to consolidate the achievements of poverty alleviation and help rural revitalization, and donated RMB100,000 yuan to Nanshan District Charity Society of Shenzhen for poverty alleviation activities in Guangdong Province; RMB122,000 yuan was invested to build a new plastic runway, parking shed, teaching equipment and improve educational facilities and equipment in Nanchang Fangda Hope Primary School.

Over the past 30 years since its establishment, while creating enterprise value, the Company has adhered to its original mission, actively fulfilled its social responsibility, gave full play to the advantages of enterprise assistance, contributed a lot to the overall victory of China's anti-poverty campaign in 2020, and demonstrated a high degree of family and country feelings and responsibility. The Company actively participated in various public welfare activities, involving public welfare, anti SARS, funding for rural health care, disaster relief, environmental protection, precision poverty alleviation, prevention and control against COVID-19 and many other aspects. As a socially responsible company, the Company has won high recognition and praise from all walks of life. It has successively won the "National Advanced Private Enterprise for Targeted Poverty Alleviation Action of the All-China Federation of Industry and Commerce" and "Advanced Private Enterprise in the Fight against the COVID-19 Epidemic", "China Outstanding Enterprise in Fulfilling Social Responsibility", "2020 China Top 500 Enterprises for Charity and Public Welfare", "China's Best Employer", Jiangxi Province's "Thousands of Enterprises Helping Thousands of Villages in Targeted Poverty Alleviation Action Advanced Private Enterprise", "Fighting against the Epidemic and Jiangxi Merchants in Action" title of the Most Beautiful Enterprise, "Guangdong Province May 1st Labor Medal", "Guangdong Province's Fight against New Coronary Pneumonia Epidemic "Outstanding Contribution to Private Enterprises" and other honors.

Based on the educational undertakings related to the future development of the country and the nation, the Company regards education for poverty alleviation and donation for education as a long-term public welfare undertaking. "Poverty alleviation must first support education, and financial priority should be given to education." In the past 30 years, the Company has donated 7 Fangda hope schools in old and poor areas such as Jinggangshan, Guangchang, and Xinjian in Jiangxi, Yan'an in Shaanxi, Bijie in Guizhou, Linzhi in Tibet, and Dapu in Guangdong and have improved the conditions for running schools in rural areas, provided children with brand-new and modern teaching buildings, and subsidized school expenses for students in difficulties, helping rural children enjoy better learning and public activity spaces, and allowing children to grow up healthily and happily.

Reasons

Applicable Inapplicable

In order to protect the Company's value and shareholders' rights and interests, the Company repurchased some domestic listed foreign shares (B shares) by means of centralized competitive trading, and completed the share repurchase cancellation procedures in Shenzhen Branch of China Securities Depository and Clearing Corporation Limited on April 23, 2021. The B shares of shares with unlimited conditions were reduced by 14,404,724, and the total share capital of the Company was reduced from 1,088,278,951 to 1,073,874,227 shares.

Approval of the change

Applicable Inapplicable

The Company's repurchase of some domestic listed foreign shares (B shares) in 2020 was reviewed and approved at the second meeting of the ninth board of directors and the 2020 annual general meeting of shareholders held by the Company on June 23, 2020 and April 12, 2021 respectively.

Share transfer

Applicable Inapplicable

The Company repurchased some 14,404,724 shares of domestically listed foreign shares (B shares) in 2020, and completed the share repurchase and cancellation procedures at the Shenzhen Branch of China Securities Depository and Clearing Corporation Limited on April 23, 2021.

Progress in the implementation of share repurchase

Applicable Inapplicable

From July 23, 2020 to September 22, 2020, the Company completed the repurchase of some domestic listed foreign shares (B shares) in 2020 by means of centralized bidding. It has repurchased 14,404,724 B shares of the Company, with the highest repurchase price of HK \$3.47/share and the lowest repurchase price of HK \$3.16/share, paid HK \$48,359,819.24 (including transaction related expenses) and 14,404,724 shares have been cancelled on April 23, 2021.

Progress in the implementation of the reduction of shareholding shares by means of centralized bidding

III. General Information

China Fangda Group Co., Ltd. (hereinafter referred to as "the Company") was approved in October 1995 by the General Office of the Shenzhen Municipal People's Government with the letter of Shenfu Office (1995) No. 194, in the original "Shenzhen Fangda Building Materials Co., Ltd." on the basis of the establishment of the fundraising method. The unified social credit code is: 91440300192448589C; registered address: Fangda Technology Building, Keji South 12th Road, South District, High-tech Industrial Park, Nanshan District, Shenzhen. Mr. Xiong Jianming is the legal representative.

The Company issued foreign currency shares (B shares) and local currency shares (A shares) and listed in November 1995 and April 1996 respectively in Shenzhen Stock Exchange. The Company received the Reply to the Non-public Share Issuance of Fangda China Group Co., Ltd. (CSRC License [2016] No.825) to allow the Company to conduct non-public issuance of 32,184,931 A-shares in June 2016. According to the 2016 Annual Profit Allocation Scheme, which was approved by the 2016 Annual Shareholders' Congress, the Company has a total share capital of 789,094,836 shares as the basis and a capital reserve fund of 5 shares per 10 shares to all shareholders. The registered capital at the end of 2017 was RMB 1,183,642,254.00. The Company repurchased and cancelled 28,160,568.00 B shares in August 2018, 32,097,497.00 B shares in January 2019, 35,105,238.00 B shares in May 2020, 14404724.00 B shares in July-September 2020 and cancelled in April 2021. The existing registered capital is RMB1,073,874,227.00 yuan.

The Company has established a corporate governance structure that comprises shareholders' meeting, board of directors and supervisory committee. Currently, the Company sets up the President Office, Administrative Department, HR Department, Enterprise Management Department, Financial Department, Audit and Supervisory Department, Securities Department, Technology Innovation Department and IT Department and has established subsidiaries including Fangda Decoration, Fangda Chuangzhi, Fangda New Material, Fangda Property and Fangda New Energy.

The business nature and main business operations of the Company and subsidiaries ("the Group") include (1) production and sales of curtain wall materials, design, production and installation of construction curtain walls; (2) assembly and production of subway screen doors; (3) development and operation of real estate projects on land, of which rights have been obtained lawfully; (4) R&D, installation and sales of PV devices, design and installation of PV power plants.

Date of financial statement approval: This financial statement is approved by the Board of Directors of the Company on August 16, 2021.

The Company in the current period includes a total of 28 subsidiaries, of which 1 have been added this year and 2 have been reduced this year. For details, please refer to "Note 6. Change of the scope of merger" and "Note 9. Rights and Interests in Other Subjects".

IV. Basis for the preparation of financial statements

1. Preparation basis

The Company prepares the financial statements based on continuous operation and according to actual transactions and events, with figures confirmed and measured in compliance with the Accounting Standards for Business Enterprises and other specific account standards, application guide and interpretations. The Company has also disclosed related financial information according to the requirement of the Regulations of Information Disclosure No.15 - General Provisions for Financial Statements (Revised in 2014) issued by the CSRC.

2. Continuous operation

The Company assessed the continuing operations capability of the Company for the 12 months from the end of the reporting period. No matters were found that would affect the Company's ability to continue as a going concern. It is reasonable for the Company to prepare financial statements based on continuing operations.

V. Significant Account Policies and Estimates

Specific accounting policy and estimate prompt:

The following major accounting policies and accounting estimates shall be formulated in accordance with the accounting standards of the enterprise. Unmentioned operations are carried out in accordance with the relevant accounting policies in the enterprise accounting standards.

1. Statement of compliance to the Enterprise Accounting Standard

These financial statements meet the requirements of the Accounting Standards for Business Enterprises and truly and fully reflect the Company's financial status, performance result, changes in shareholders' equity and cash flows.

2. Fiscal Period

The Company's fiscal year starts on January 1 and ends on December 31 of the Gregorian calendar.

3. Operation period

Our normal business cycle is one year

4. Bookkeeping standard money

The Company's bookkeeping standard currency is Renminbi, and overseas subsidiaries are based on the currency of the main economic environment in which they operate.

5. Accounting treatment of the entities under common and different control

(1) Consolidation of entities under common control

The assets and liabilities acquired by the Company in a business combination are measured at the book value of the combined party in the consolidated financial statements of the ultimate controlling party on the date of combination. Among them, if the accounting policy adopted by the merger party is different from that adopted by the Company before the merger, the accounting policy is unified based on the principle of importance, that is, the book value of the assets and liabilities of the merger party is adjusted according to the accounting policy of the Company. If there is a difference between the book value of the net assets acquired by the Company in the business combination and the book value of the consideration paid, first adjust the balance of the capital reserve (capital premium or equity premium), the balance of the capital reserve (capital premium or equity premium) If it is insufficient to offset, the surplus reserve and undistributed profits will be offset in sequence.

See Note V, 6 for the accounting treatment method of business combination under the same control through step-by-step transaction.

(2) Consolidation of entities under different control

All identifiable assets and liabilities acquired by the Company during the merger shall be measured at its fair value on the date of purchase. Among them, if the accounting policy adopted by the merger party is different from that adopted by the Company before the merger, the accounting policy is unified based on the principle of importance, that is, the book value of the assets and liabilities of the merger party is adjusted according to the accounting policy of the Company. The merger cost of the Company on the date of purchase is greater than the fair value of the assets and liabilities recognized by the purchaser in the merger, and is recognized as goodwill. If the merger cost is less than the difference between the identifiable assets and the fair value of the liabilities obtained by the purchaser in the enterprise merger, the merger cost and the fair value of the identifiable assets and the liabilities obtained by the purchaser in the enterprise merger are reviewed, and the merger cost is still less than the fair value of the identifiable assets and liabilities obtained by the purchaser after the review, the difference is considered as the profit and loss of the current period of the merger.

See Note V, 6 for the accounting treatment method of business combination under the same control through step-by-step transaction.

(3) Treatment of related transaction fee in enterprise merger

Agency expenses and other administrative expenses such as auditing, legal consulting, or appraisal services occurred relating to the merger of entities are accounted into current income account when occurred. The transaction fees of equity certificates or liability certificates issued by the purchaser for payment for the acquisition are accounted at the initial amount of the certificates.

6. Preparation of Consolidated Financial Statements

(1) Determination of consolidation scope

The consolidated scope of the consolidated financial statements is determined on a control basis and includes not only subsidiaries determined on the basis of voting rights (or similar voting rights) themselves or in conjunction with other arrangements, but also structured subjects determined on the basis of one or more contractual arrangements.

Control means the power possessed by the Company on invested entities to share variable returns by participating in related activities of the invested entities and to impact the amount of the returns by using the power. The subsidiary company is the subject controlled by the Company (including the enterprise, the divisible part of the invested unit and the structured subject controlled by the enterprise, etc.). The structured subject

is the subject which is not designed to determine the controlling party by taking the voting right or similar right as the decisive factor.

(2) Preparation of Consolidated Financial Statements

The Company prepares consolidated financial statements based on the financial statements of itself and its subsidiaries and based on other relevant information.

The Company compiles consolidated financial statements, regards the whole enterprise group as an accounting entity, reflects the overall financial status, operating results and cash flow of the enterprise group according to the confirmation, measurement and presentation requirements of the relevant enterprise accounting standards, and the unified accounting policy and accounting period.

① Merge the assets, liabilities, owner's rights and interests, income, expenses and cash flow of parent company and subsidiary company.

② Offset the long-term equity investment of the parent company to the subsidiary company and the share of the parent company in the ownership rights of the subsidiary company.

③ Offset the influence of internal transaction between parent company, subsidiary company and subsidiary company. If an internal transaction indicates that the relevant asset has suffered an impairment loss, the part of the loss shall be confirmed in full.

④ adjust the special transaction from the angle of enterprise group.

(3) Processing of subsidiaries during the reporting period

① Increase of subsidiaries or business

A. Subsidiary or business increased by business combination under the same control

(a) When preparing the consolidated balance sheet, adjust the opening number of the consolidated balance sheet and adjust the related items of the comparative statement. The same report entity as the consolidated balance sheet will exist from the time of the final control party.

(b) When preparing the consolidated cash flow statement, the cash flows of the subsidiary and the business combination from the beginning of the current period to the end of the reporting period are included in the consolidated cash flow statement, and the related items of the comparative statement are adjusted, which is regarded as the combined report body since the final The controller has been there since the beginning of control.

(c) When preparing the consolidated cash flow statement, the cash flows of the subsidiary and the business combination from the beginning of the current period to the end of the reporting period are included in the consolidated cash flow statement, and the related items of the comparative statement are adjusted, which is regarded as the combined report body since the final The controller has been there since the beginning of control.

B. Subsidiaries or businesses added by business combinations not under the same control

(a) When preparing the consolidated balance sheet, the opening number of the consolidated balance sheet is not adjusted.

(b) When preparing the consolidated profit statement, the income, expense and profit of the subsidiary company and the business Purchase date and Closing balance shall be included in the consolidated profit statement.

(c) When the consolidated cash flow statement is prepared, the cash flow from the purchase date of the subsidiary to the end of the reporting period is included in the consolidated cash flow statement.

② Disposal of subsidiaries or business

(A) When preparing the consolidated balance sheet, the opening number of the consolidated balance sheet is not adjusted.

B. When preparing the consolidated profit statement, the income, expense and profit of the subsidiary company and the business opening and disposal date shall be included in the consolidated profit statement.

C. When the consolidated cash flow statement is prepared, the cash flow from the Beginning of the period of the subsidiary to the end of the reporting period is included in the consolidated cash flow statement.

(4) Special considerations in consolidation offsets

① The long-term equity investment held by a subsidiary company shall be regarded as the inventory shares of the Company as a subtraction of the owner's rights and interests, which shall be listed under the item of "subtraction: Stock shares" under the item of owner's rights and interests in the consolidated balance sheet.

The long-term equity investments held by the subsidiaries are offset by the shares of the shareholders of the subsidiaries.

② The "special reserve" and "general risk preparation" projects, because they are neither real capital (or share capital) nor capital reserve, but also different from the retained income and undistributed profits, are restored according to the ownership of the parent company after the long-term equity investment is offset by the ownership rights and interests of the subsidiary company.

③ If there is a temporary difference between the book value of assets and liabilities in the consolidated balance sheet and the taxable basis of the taxpayer due to the offset of the unrealized internal sales gain or loss, the deferred income tax asset or the deferred income tax liability is confirmed in the consolidated balance sheet, and the income tax expense in the consolidated profit statement is adjusted, with the exception of the deferred income tax related to the transaction or event directly included in the owner's equity and the merger of the enterprise.

④ The unrealized internal transaction gains and losses incurred by the Company from selling assets to subsidiaries shall be fully offset against the "net profit attributable to the owners of the parent company". The unrealized internal transaction gains and losses arising from the sale of assets by the subsidiary to the Company shall be offset between the "net profit attributable to the owners of the parent company" and the "minority shareholder gains and losses" in accordance with the Company's distribution ratio to the subsidiary. The unrealized internal transaction gains and losses arising from the sale of assets between subsidiaries shall be offset between the "net profit attributable to the owners of the parent company" and the "minority shareholders' gains and losses" in accordance with the Company's distribution ratio to the seller's subsidiary.

⑤ If the current loss shared by the minority shareholders of the subsidiary exceeds the share of the minority shareholders in the owner's equity of the subsidiary at the beginning of the period, the balance should still be offset against the minority shareholders' equity.

(5) Accounting treatment of special transactions

① Purchase minority shareholders' equity

The Company purchases the shares of the subsidiaries owned by the minority shareholders of the subsidiaries. In the individual financial statements, the investment costs of the newly acquired long-term investments of the minority shares shall be measured at the fair value of the price paid. In the consolidated financial statements, the difference between the newly acquired long-term equity investment due to the purchase of minority equity and the share of net assets that should be continuously calculated by the subsidiary since the purchase date or the merger date should be adjusted according to the new shareholding ratio. The product (capital premium or equity premium), if the capital reserve is insufficient to offset, the surplus reserve and undistributed profits are offset in turn.

② Step-by-step acquisition of control of the subsidiary through multiple transactions

A. Enterprise merger under common control through multiple transactions

On the date of the merger, the Company determines the initial investment cost of the long-term equity investment in the individual financial statements based on the share of the subsidiary's net assets that should be enjoyed after the merger in the final controller's consolidated financial statements; the initial investment cost and the difference between the book value of the long-term equity investment before the merger plus the book value of the consideration paid for new shares acquired on the merger date, the capital reserve (capital premium or equity premium) is adjusted, and the capital reserve (capital premium or equity premium) is insufficient to offset. Reduced, in turn offset the surplus reserve and undistributed profits.

In consolidated financial statements, assets and liabilities obtained by the merging party from the merged party should be

measured at the book value in the final controlling party's consolidated financial statements other than the adjustment made due to differences in accounting policies; adjust the capital surplus (share premium) according to the difference between the initial investment cost and the book value of the held investment before merger plus the book value of the consideration paid on the merger date. Where the capital surplus falls short, the retained income should be adjusted.

If the merging party holds the equity investment before acquiring the control of the merged party and is accounted for according to the equity method, the date of acquiring the original equity and the merging party and the merged party are in the same party's final control from the later date to the merger date. The relevant gains and losses, other comprehensive income and other changes in owner's equity have been confirmed between them, and the retained earnings at the beginning of the comparative statement period should be offset separately.

B. Enterprise merger not under common control through multiple transactions

On the merger day, in individual financial statements, the initial investment cost of the long-term equity investment on the merger day is based on the book value of the long-term equity investment previously held plus the sum of the additional investment costs on the merger day.

In the consolidated financial statements, the equity of the purchaser held prior to the date of purchase is revalued according to the fair value of the equity at the date of purchase, and the difference between the fair value and its book value is credited to the current investment income; If the shares held by the purchaser prior to the date of purchase involve other consolidated gains under the equity law accounting, the other consolidated gains related thereto shall be converted to the current gains on the date of purchase, with the exception of the other consolidated gains arising from the remeasurement of the net assets or net liabilities of the merged party. The Company disclosed in the notes the fair value of the equity of the purchased party held before the purchase date and the amount of related gains or losses remeasured according to the fair value.

(3) The Company disposes of long-term equity investment in subsidiaries without losing control

The parent company partially disposes of the long-term equity investment in the subsidiary company without losing control. In the consolidated financial statements, the disposal price corresponds to the disposal of the long-term equity investment. The difference between the shares is adjusted for the capital reserve (capital premium or equity premium). If the capital reserve is insufficient to offset, the retained earnings are adjusted.

④ The Company disposes of long-term equity investment in subsidiaries and loses control

A. One transaction disposition

If the Company loses control over the Invested Party due to the disposal of part of the equity investment, it shall remeasure the remaining equity according to its fair value at the date of loss of control when compiling the consolidated financial statement. The sum of the consideration obtained from the disposal of equity and the fair value of the remaining equity minus the difference between the share of the original subsidiary's net assets that should be continuously calculated from the purchase date or the merger date, calculated as the loss of control. The investment income of the current period.

Other comprehensive income and other owner's equity changes related to the equity investment of the atomic company are transferred to the current profit and loss when the control is lost, except for other comprehensive income arising from the remeasurement of the net benefits or net assets of the defined benefit plan by the investee. .

B. Multi-transaction step-by-step disposition

In consolidated financial statements, you should first determine whether a step-by-step transaction is a "blanket transaction".

If the step-by-step transaction does not belong to a "package deal", in the individual financial statements, for each transaction before the loss of control of the subsidiary, the book value of the long-term equity investment corresponding to each disposal of equity is carried forward, the price received and the disposal. The difference between the book value of the long-term equity investment is included in the current investment income; in the consolidated financial statements, it should be handled in accordance

with the relevant provisions of "the parent company disposes of the long-term equity investment in the subsidiary without losing control."

If a step-by-step transaction belongs to a "blanket transaction", the transaction shall be treated as a transaction that disposes of the subsidiary and loses control; In individual financial statements, the difference between each disposal price before the loss of control and the book value of the long-term equity investment corresponding to the equity being disposed of is first recognized as other consolidated gains and then converted to the current loss of control at the time of the loss of control; In the consolidated financial statements, for each transaction prior to the loss of control, the difference between the disposition of the price and the disposition of the investment corresponding to the share in the net assets of the subsidiary shall be recognized as other consolidated gains and shall, at the time of the loss of control, be transferred to the loss of control for the current period.

Where the terms, conditions, and economic impact of each transaction meet one or more of the following conditions, usually multiple transactions are treated as a "package deal":

(a) These transactions were concluded at the same time or in consideration of mutual influence.

(b) These transactions can only achieve the business result as a whole;

(c) The effectiveness of one transaction depends the occurrence of at least another transaction;

(d) A single transaction is not economic and is economic when considered together with other transactions.

(5) Proportion of minority shareholders in factor companies who increase capital and dilute ownership of parent companies

Proportion of Others (minority shareholders in factor companies who increase capital , dilute Subsidiaries of parent companies. In the consolidated financial statements, the share of the parent company in the net book assets of the former subsidiary of the capital increase is calculated according to the share ratio of the parent company before the capital increase, the difference between the share and the net book assets of the latter subsidiary after the capital increase is calculated according to the share ratio of the parent company, the capital reserve (capital premium or capital premium), the capital reserve (capital premium or capital premium) is not offset, and the retained income is adjusted.

7. Recognition of cash and cash equivalents

Cash refers to cash in stock and deposits that can be used for payment at any time. Cash equivalents refer to investments with a short holding period (generally referring to expiry within three months from the date of purchase), strong liquidity, easy to convert to a known amount of cash, and little risk of value change.

8.Foreign exchange business and foreign exchange statement translation

(1) Methods for determining conversion rates in foreign currency transactions

When the Company's foreign currency transactions are initially confirmed, they will be converted into the bookkeeping standard currency at the spot exchange rate on the transaction date.

(2) Methods of conversion of foreign currency currency items on balance sheet days

At the balance sheet date, foreign currency items are translated on the spot exchange rate of the balance sheet date. The exchange differences caused by the difference in exchange rates on the balance sheet date and initial recognizing date or previous balance sheet date are included in the current profits and losses. Non-monetary items accounted in foreign currency and on historical costs are exchanged with the spot exchange rate on the transaction date. Non-monetary items accounted in foreign currency and on fair value are exchanged with the spot exchange rate on the determination date of the fair value. The exchange difference between the accounting standard-currency amount and the original accounting standard-currency amount are included in the

current profits and losses.

(3) Foreign currency statement conversion method

Prior to the conversion of the financial statements of an enterprise's overseas operations, the accounting period and policy of the overseas operations should be adjusted to conform to the accounting period and policy of the enterprise. The financial statements of the corresponding currency (other than the functional currency) should be prepared according to the adjusted accounting policy and the accounting period. The financial statements of the overseas operations should be converted according to the following methods:

① The assets and liabilities items in the balance sheet are translated at the spot exchange rate on the balance sheet date. Except for the "undistributed profits" items, the owner's equity items are translated at the spot exchange rate when they occur.

② The income and expense items in the profit statement are converted at the spot exchange rate on the transaction date or the approximate exchange rate of the spot exchange rate.

③ The foreign currency cash flow and the foreign subsidiary's cash flow are converted using the immediate exchange rate or the approximate exchange rate at the date of the cash flow. The impact of exchange rate changes on cash should be used as an adjustment item and presented separately in the cash flow statement.

④ During the preparation of the consolidated financial statements, the resulting foreign currency financial statement conversion variance is presented separately under the owner's equity item in the consolidated balance sheet.

When foreign operations are disposed of and the control rights are lost, the difference in foreign currency statements related to the overseas operations that are listed in the shareholders' equity items in the balance sheet is transferred to the profit or loss for the current period, either in whole or in proportion to the disposal of the foreign operations.

9. Financial instrument

Financial instrument refers to a company's financial assets and contracts that form other units of financial liabilities or equity instruments.

(1) Recognition and de-recognition of financial instrument

The Company recognizes a financial asset or liability when it becomes one party in the financial instrument contract.

Financial asset is derecognized when:

- ① The contractual right to receive the cash flows of the financial assets is terminated;
- ② The financial asset is transferred and meets the following derecognition condition.

If the current obligation of a financial liability (or part of it) has been discharged, the Company derecognises the financial liability (or part of the financial liability). When the Company (borrower) and lender enter into an agreement to replace the original financial liabilities by undertaking new financial liabilities and the contract terms for the new financial liabilities are essentially different from those for the original one, the original financial liabilities will be derecognized and new financial liabilities will be recognized. Where the Company makes substantial amendments to the contract terms of the original financial liability (or part thereof), it shall terminate the original financial liability and confirm a new financial liability in accordance with the amended terms.

Financial asset transactions in regular ways are recognized and de-recognized on the transaction date. The conventional sale of financial assets means the delivery of financial assets in accordance with the contractual terms and conditions, at the time set out in the regulations or market practices. Transaction date refers to the date when the Company promises to buy or sell financial assets.

(2) Classification and subsequent measurement of financial assets

At initial recognition, the Company classifies financial assets into the following three categories based on the business model of managing financial assets and the contractual cash flow characteristics of financial assets: financial assets measured at amortized cost are measured at fair value and their changes are included in other financial assets with current profit and loss and financial assets measured at fair value through profit or loss. Unless the Company changes the business model for managing financial assets, in this case, all affected financial assets are reclassified on the first day of the first reporting period after the business model changes, otherwise the financial assets may not be initially confirmed.

Financial assets are measured at the fair value at the initial recognition. For financial assets measured at fair value with variations accounted into current income account, related transaction expenses are accounted into the current income. For other financial assets, the related transaction expenses are accounted into the initial recognized amounts. Bills receivable and accounts receivable arising from the sale of commodities or the provision of labor services that do not contain or do not consider significant financing components, the Company performs initial measurement according to the transaction price defined by the income standard.

The subsequent measurement of financial assets depends on their classification:

① Financial assets measured at amortized cost

Financial assets that meet the following conditions at the same time are classified as financial assets measured at amortized cost: The Company's business model for managing this financial asset is to collect contractual cash flows as its goal; the contract terms of the financial asset stipulate that Cash flow is only the payment of principal and interest based on the outstanding principal amount. For such financial assets, the actual interest rate method is used for subsequent measurement according to the amortized cost. The gains or losses arising from the termination of recognition, amortization or impairment based on the actual interest rate method are included in the current profit and loss.

② Financial assets measured at fair value and whose changes are included in other comprehensive income

Financial assets that meet the following conditions at the same time are classified as financial assets measured at fair value and their changes are included in other comprehensive income: The Company's business model for managing this financial asset is to both target the collection of contractual cash flows and the sale of financial assets. Objective; The contractual terms of the financial asset stipulate that the cash flow generated on a specific date is only for the payment of principal and interest based on the outstanding principal amount. For such financial assets, fair value is used for subsequent measurement. Except for impairment losses or gains and exchange gains and losses recognized as current gains and losses, changes in the fair value of such financial assets are recognized as other comprehensive income. Until the financial asset is derecognized, its accumulated gains or losses are transferred to current gains and losses. However, the relevant interest income of the financial asset calculated by the actual interest rate method is included in the current profit and loss.

The Company irrevocably chooses to designate a portion of non-tradable equity instrument investment as a financial asset measured at fair value and whose variation is included in other consolidated income. Only the relevant dividend income is included in the current profit and loss, and the variation of fair value is recognized as other consolidated income.

③ Financial assets measured at fair value with variations accounted into current income account

The above financial assets measured at amortized cost and other financial assets measured at fair value and whose changes are included in other comprehensive income are classified as financial assets measured at fair value and whose changes are included in the current profit and loss. For such financial assets, fair value is used for subsequent measurement, and all changes in fair value are included in current profit and loss.

(3) Classification and measurement of financial liabilities

The Company classifies financial liabilities into financial liabilities measured at fair value and their

changes included in the current profit and loss, loan commitments and financial guarantee contract liabilities for loans below market interest rates, and financial liabilities measured at amortized cost.

The subsequent measurement of financial liabilities depends on their classification:

① Financial liabilities measured at fair value with variations accounted into current income account

Such financial liabilities include transactional financial liabilities (including derivatives that are financial liabilities) and financial liabilities designated as at fair value through profit or loss. After the initial recognition, the financial liabilities are subsequently measured at fair value. Except for the hedge accounting, the gains or losses (including interest expenses) are recognized in profit or loss. However, for the financial liabilities designated as fair value and whose variations are included in the profits and losses of the current period, the variable amount of the fair value of the financial liability due to the variation of credit risk of the financial liability shall be included in the other consolidated income. When the financial liability is terminated, the cumulative gains and losses previously included in the other consolidated income shall be transferred out of the other consolidated income and shall be included in the retained income.

② Loan commitments and financial security contractual liabilities

A loan commitment is a promise that the Company provides to customers to issue loans to customers with established contract terms within the commitment period. Loan commitments are provided for impairment losses based on the expected credit loss model.

A financial guarantee contract refers to a contract that requires the Company to pay a specific amount of compensation to the contract holder who suffered a loss when a specific debtor is unable to repay the debt in accordance with the original or modified debt instrument terms. Financial guarantee contract liabilities are subsequently measured based on the higher of the loss reserve amount determined in accordance with the principle of impairment of financial instruments and the initial recognition amount after deducting the accumulated amortization amount determined in accordance with the revenue recognition principle.

③ Financial liabilities measured at amortized cost

After initial recognition, other financial liabilities are measured at amortized cost using the effective interest method.

Except in special circumstances, financial liabilities and equity instruments are distinguished according to the following principles:

① If the Company cannot unconditionally avoid delivering cash or other financial assets to fulfill a contractual obligation, the contractual obligation meets the definition of financial liability. While some financial instruments do not explicitly contain terms and conditions for the delivery of cash or other financial assets, they may indirectly form contractual obligations through other terms and conditions.

If a financial instrument is required to be settled with or can be settled with the Company's own equity instruments, the Company's own equity instrument used to settle the instrument needs to be considered as a substitute for cash or other financial assets or for the holder of the instrument to enjoy the remaining equity in the assets after all liabilities are deducted. If it is the former, the instrument is the financial liabilities of the issuer; if it is the latter, the instrument is the equity instrument of the issuer. In some cases, a financial instrument contract provides that the Company shall or may use its own instrument of interest, in which the amount of a contractual right or obligation is equal to the amount of the instrument of its own interest which may be acquired or delivered multiplied by its fair value at the time of settlement, whether the amount of the contractual right or obligation is fixed or is based entirely or in part on a variation of a variable other than the market price of the instrument of its own interest, such as the rate of interest, the price of a commodity or the price of a financial instrument, the contract is classified as a financial liability.

(4) Derivative financial instruments and embedded derivatives

Derivative financial instruments are initially measured at the fair value of the day when the derivative transaction contract is signed, and are subsequently measured at their fair values. Derivative financial instruments with a positive fair value are recognized as asset, and instruments with a negative fair value are recognized as liabilities.

The gains and losses arising from the change in fair value of derivatives are directly included in the profits and losses of the current period, except that the part of the cash flow that is valid in the hedge is included in the other consolidated income and transferred out when the hedged item affects the gain and loss of the current period.

For a hybrid instrument containing an embedded derivative instrument, if the principal contract is a financial asset, the hybrid instrument as a whole applies the relevant provisions of the financial asset classification. If the main contract is not a financial asset, and the hybrid instrument is not measured at fair value and its changes are included in the current profit and loss for accounting, the embedded derivative does not have a close relationship with the main contract in terms of economic characteristics and risks, and it is If the instruments with the same conditions and exist separately meet the definition of derivative instruments, the embedded derivative instruments are separated from the mixed instruments and treated as separate derivative financial instruments. If the fair value of the embedded derivative on the acquisition date or the subsequent balance sheet date cannot be measured separately, the hybrid instrument as a whole is designated as a financial asset or financial liability measured at fair value and whose changes are included in the current profit or loss.

(5) Impairment of financial instruments

The Company shall confirm the preparation for loss on the basis of expected credit loss for financial assets measured at amortization costs, creditor's rights investments measured at fair value, contractual assets, leasing receivables, loan commitments and financial guarantee contracts, etc.

① Measurement of expected credit losses of accounts receivable

The expected credit loss refers to the weighted average of the credit losses of financial instruments that are weighted by the risk of default. Credit loss refers to the difference between all contractual cash flows receivable from the contract and all cash flows expected to be received by the Company at the original actual interest rate, that is, the present value of all cash shortages. Among them, the financial assets which have been purchased or born by the Company shall be discounted according to the actual rate of credit adjustment of the financial assets.

The expected lifetime credit loss is the expected credit loss due to all possible default events during the entire expected life of the financial instrument.

Expected credit losses in the next 12 months are expected to result from possible defaults in financial instruments within 12 months after the balance sheet date (or estimated duration of financial instruments if the expected duration is less than 12 months) Credit losses are part of the expected lifetime credit loss.

On each balance sheet day, the Company measures the expected credit losses of financial instruments at different stages. Where the credit risk has not increased significantly since the initial confirmation of the financial instrument, it is in the first stage. The Company measures the preparation for loss according to the expected credit loss in the next 12 months. Where the credit risk has increased significantly since the initial confirmation but the credit impairment has not occurred, the financial instrument is in the second stage. Where a credit impairment has occurred since the initial confirmation of the financial instrument, it shall be in the third stage, and the Company shall prepare for measuring the expected credit loss of the whole survival period of the instrument.

For financial instruments with low credit risk on the balance sheet date, the Company assumes that the credit risk has not increased significantly since the initial recognition, and measures the loss provision based on the expected credit losses in the next 12 months.

For financial instruments that are in the first and second stages and with lower credit risk, the Company calculates interest income based on their book balances and actual interest rates without deduction for impairment provision. For financial instruments in the third stage, interest income is calculated based on the amortized cost and the actual interest rate after the book balance minus the provision for impairment.

Regarding bills receivable, accounts receivable and financing receivables, regardless of whether there is a significant financing component, the Company measures the loss provision based on the expected credit losses throughout the duration.

A Accounts receivable/contract assets

Where there is objective evidence of impairment, as well as other receivable instruments, receivables, other receivables, receivables financing and long-term receivables applicable to individual assessments, separate impairment tests are performed to confirm expected credit losses and prepare individual impairment. For notes receivable, accounts receivable, other receivables, financing of receivables, long-term receivables, and contract assets for which there is no objective evidence of impairment, or when individual financial assets cannot be assessed at a reasonable cost, the Company divides bills receivable, accounts receivable, other receivables, receivable financing, long-term receivables, and contract assets into several combinations based on credit risk characteristics, and calculates expected credit losses on the basis of the combination. The basis for determining the combination is as follows:

The basis for determining the combination of notes receivable is as follows:

Notes Receivable Combination1 Commercial Acceptance Bill

Notes Receivable Combination1 Commercial Acceptance Bill

For Notes receivable divided into portfolios, the Company refers to historical credit loss experience, combined with current conditions and predictions of future economic conditions, and calculates through default risk exposure and expected credit loss rate within the next 12 months or the entire duration Expected credit losses.

The basis for determining the combination of accounts receivable is as follows:

Accounts receivable combination 1 Accounts receivable business

Accounts receivable combination 2 Real estate receivable business

Accounts receivable combination 3 Others receivable business

Other receivable portfolio 4 Receivables from related parties within the scope of consolidation

For the accounts receivable divided into a combination, the Company refers to the historical credit loss experience, combined with the current situation and the forecast of the future economic situation, compiles the account receivable age and the whole expected credit loss rate table, and calculates the expected credit loss.

The basis for determining the combination of other receivables is as follows:

Other receivable portfolio 1 Interest receivable

Portfolio of other receivables 2 Dividends receivable

Other combinations of receivables 3 Deposit and margin receivable

Other receivable portfolio 4 Receivable advances

Combination of other receivables 5 Value-added tax receivable is increased and refunded

Other receivable portfolio 6 Receivables from related parties within the scope of consolidation

Other receivables portfolio 7 Other receivables

For other receivables divided into portfolios, the Company refers to historical credit loss experience, combined with current conditions and predictions of future economic conditions, and calculates through default risk exposure and expected credit loss rate within the next 12 months or the entire duration Expected credit losses.

The basis for determining the combination of receivables financing is as follows:

Receivables financing portfolio 1 bank acceptance bill

For Notes receivable divided into portfolios, the Company refers to historical credit loss experience, combined with current conditions and predictions of future economic conditions, and calculates through default risk exposure and expected credit loss rate within the next 12 months or the entire duration Expected credit losses.

The basis for determining the portfolio of contract assets is as follows:

Contract assets portfolio 1 conditional collection right of sales

Contract assets portfolio 2 Completed and unsettled project not meeting collection conditions

Contract assets portfolio 3 Quality guarantee deposit not meeting collection conditions

For contract assets divided into portfolios, the Company refers to historical credit loss experience, combined with current conditions and predictions of future economic conditions, and calculates through default risk exposure and expected credit loss rate within the next 12 months or the entire duration Expected credit losses.

Other debt investment

For other receivables divided into portfolios, the Company refers to historical credit loss experience, combined with current conditions and predictions of future economic conditions, and calculates through default risk exposure and expected credit loss rate within the next 12 months or the entire duration Expected credit losses.

② Lower credit risk

If the risk of default on financial instruments is low, the borrower's ability to meet its contractual cash flow obligations in the short term is strong, and even if the economic situation and operating environment are adversely changed over a long period of time, it may not necessarily reduce the receivables' performance of their contractual cash. The ability of the flow obligation, the financial instrument is considered to have a lower credit risk.

③ Significant increase in credit risk

The Company compares the default probability of the financial instrument during the expected lifetime determined by the balance sheet date with the default probability of the expected lifetime during the initial confirmation to determine the relative probability of the default probability of the financial instrument during the expected lifetime Changes to assess whether the credit risk of financial instruments has increased significantly since initial recognition.

In determining whether the credit risk has increased significantly since the initial recognition, the Company considers reasonable and evidenced information, including forward-looking information, that can be obtained without unnecessary additional costs or effort. The information considered by the Company includes:

A. Significant changes in internal price indicators resulting from changes in credit risk;

B. Adverse changes in business, financial or economic conditions that are expected to cause significant changes in the debtor's ability to perform its debt service obligations;

C. Whether the actual or expected operating results of the debtor have changed significantly; whether the regulatory, economic or technical environment of the debtor has undergone significant adverse changes;

D. Whether there is a significant change in the value of the collateral used as debt collateral or the guarantee provided by a third party or the quality of credit enhancement. These changes are expected to reduce the debtor's economic motivation for repayment within the time limit specified in the contract or affect the probability of default;

E. Whether there is a significant change in the economic motivation that is expected to reduce the debtor's repayment according to the contractual deadline;

F. Anticipated changes to the loan contract, including whether the expected violation of the contract may result in the exemption or revision of contract obligations, granting interest-free periods, rising interest rates, requiring additional collateral or

guarantees, or making other changes to the contractual framework of financial instruments change;

G. Whether the expected performance and repayment behavior of the debtor has changed significantly;

H. Whether the contract payment is overdue for more than (including) 30 days.

Based on the nature of financial instruments, the Company assesses whether credit risk has increased significantly on the basis of a single financial instrument or combination of financial instruments. When conducting an assessment based on a combination of financial instruments, the Company can classify financial instruments based on common credit risk characteristics, such as overdue information and credit risk ratings.

If the overdue period exceeds 30 days, the Company has determined that the credit risk of financial instruments has increased significantly. Unless the Company does not have to pay excessive costs or efforts to obtain reasonable and warranted information, it proves that although it has exceeded the time limit of 30 days agreed upon in the Contract, credit risks have not increased significantly since the initial confirmation.

④ Financial assets with credit impairment

The Company assesses on the balance sheet date whether financial assets measured at amortized cost and credit investments measured at fair value and whose changes are included in other comprehensive income have undergone credit impairment. When one or more events that adversely affect the expected future cash flows of a financial asset occur, the financial asset becomes a financial asset that has suffered a credit impairment. Evidence that credit impairment has occurred in financial assets includes the following observable information:

Major financial difficulties have occurred to the issuer or the debtor; Breach of contract by the debtor, such as payment of interest or default or overdue of principal; (B) The concession that the debtor would not make under any other circumstances for economic or contractual considerations relating to the financial difficulties of the debtor; The debtor is likely to be bankrupt or undertake other financial restructuring; The financial difficulties of the issuer or debtor lead to the disappearance of the active market for the financial asset; To purchase or generate a financial asset at a substantial discount, which reflects the fact that a credit loss has occurred.

⑤ Presentation of expected credit loss measurement

In order to reflect the changes in the credit risk of financial instruments since the initial recognition, the Company re-measures the expected credit losses on each balance sheet date, and the increase or reversal of the loss provision resulting therefrom is included as an impairment loss or gain. Current profit and loss. For financial assets measured at amortized cost, the loss allowance offsets the book value of the financial asset listed on the balance sheet; for debt investments measured at fair value and whose changes are included in other comprehensive income, the Company Recognition of its loss provisions in gains does not offset the book value of the financial asset.

⑥ Canceled

If it is no longer reasonably expected that the contract cash flow of the financial assets will be fully or partially recovered, the book balance of the financial assets will be directly reduced. Such write-off constitute the derecognition of related financial assets. This usually occurs when the Company determines that the debtor has no assets or sources of income that generate sufficient cash flow to cover the amount that will be written down.

If the financial assets that have been written down are recovered in the future, the reversal of the impairment loss is included in the profit or loss of the current period.

(6) Transfer of financial assets

The transfer of financial assets refers to the following two situations:

A. Transfer the contractual right to receive cash flow of financial assets to another party;

B. Transfers the financial assets to the other party in whole or in part, but reserves the contractual right to collect the cash flow

of the financial assets and undertakes the contractual obligation to pay the collected cash flow to one or more recipients.

① De-identification of transferred financial assets

Those who have transferred almost all risks and rewards in the ownership of financial assets to the transferee, or have neither transferred nor retained almost all the risks and rewards in the ownership of financial assets, but have given up control of the financial assets, terminate the confirmation The financial asset.

In determining whether control over the transferred financial asset has been waived, the actual capacity of the transferor to sell the financial asset is determined. If the transferor is able to sell the transferred financial assets wholly to a third party that does not have a relationship with them, and has no additional conditions to limit the sale, it indicates ds has waived control over the financial assets.

The Company pays attention to the essence of financial asset transfer when judging whether financial asset transfer meets the condition of financial asset termination.

If the overall transfer of financial assets meets the conditions for termination of confirmation, the difference between the following two amounts is included in the current profit and loss:

A. Continuing identification of transferred Book value;

B. The sum of the amount received as a result of the transfer and the amount accrued as a result of the change in the fair value of the transfer in respect of the termination recognized portion of the amount previously charged directly to the other consolidated proceeds (the financial assets involved in the transfer are those classified in accordance with Article 18 of Enterprise Accounting Standard No. 22 - Financial Instruments Recognition and Measurement as measured by the fair value and whose change is charged to the other consolidated proceeds).

If the partial transfer of financial assets meets the conditions for derecognition, the book value of the entire transferred financial assets will be included in the derecognized part and the unterminated part (in this case, the retained service assets are regarded as part of the continued recognition of financial assets) Between them, they are apportioned according to their respective relative fair values on the transfer date, and the difference between the following two amounts is included in the current profit and loss:

A. Termination of the book value of the recognized portion on the date of derecognition;

B. The sum of the amount received as a result of the transfer and the amount accrued as a result of the change in the fair value of the transfer in respect of the termination recognized portion of the amount previously charged to the other consolidated proceeds (the financial assets involved in the transfer are those classified in accordance with Article 18 of Enterprise Accounting Standard No. 22 - Financial Instruments Recognition and Measurement as measured by the fair value and whose change is charged to the other consolidated proceeds).

② Continue to be involved in the transferred financial assets

If neither transfer nor retain almost all the risks and rewards of the ownership of financial assets, and have not given up control of the financial assets, the relevant financial assets should be confirmed according to the extent of their continued involvement in the transferred financial assets, and the relevant liabilities should be recognized accordingly.

The extent to which the transferred financial assets continue to be involved refers to the extent to which the enterprise undertakes the risk or compensation of the value change of the transferred financial assets.

(III) Continuing identification of transferred financial assets

Where almost all risks and remuneration in relation to ownership of the transferred financial assets are retained, the whole of the transferred financial assets shall continue to be recognized and the consideration received shall be recognized as a financial liability.

The financial asset and the recognized related financial liabilities shall not offset each other. In the subsequent accounting period, the enterprise shall continue to recognize the income (or gain) generated by the financial asset and the costs (or losses) incurred by the financial liability.

(7) Deduction of financial assets and liabilities

Financial assets and financial liabilities should be listed separately in the balance sheet, and cannot be offset against each other. However, if the following conditions are met, the net amount offset by each other is listed in the balance sheet:

The Company has a statutory right to offset the confirmed amount, and such legal right is currently enforceable;

The Company plans to settle the net assets or realize the financial assets and liquidate the financial liabilities at the same time.

The transferring party shall not offset the transferred financial assets and related liabilities if it does not meet the conditions for terminating the recognition.

(8) Recognition of fair value of Finance instruments

See Note V 34 (1) for the recognition of fair value of financial assets and liabilities) .

10. Notes receivable

See Chapter X, V, Important Accounting Policies and Accounting Estimates 9. Financial Tools.

11. Account receivable

See Chapter X, V, Important Accounting Policies and Accounting Estimates 9. Financial Tools.

The Company must comply with disclosure requirements of the Shenzhen Stock Exchange Industry Information Disclosure Guideline No.6 - Listed Companies Engaged in Decoration Business.

12. Receivable financing

See Chapter X, V, Important Accounting Policies and Accounting Estimates 9. Financial Tools.

13. Other receivables

Methods for Determining Expected Credit Loss of Other Receivables and Accounting Processing Methods

See Chapter X, V, Important Accounting Policies and Accounting Estimates 9. Financial Tools.

14. Inventories

(1) Classification of inventories

Inventory refers to the finished products or commodities held by the Company for sale in daily activities, the products in process of production, the materials and materials consumed in the process of production or providing labor services, including entrusted processing materials, raw materials, products in process, materials in transit, stored goods, low value consumables, development costs, development products and contract performance costs, etc.

(2) Valuation method for issuing inventory

Inventories are measured at cost when procured. Raw materials, products in process and commodity stocks in transit are measured by the weighted average method.

The real estate business inventory mainly includes inventory materials, products under development, completed development products, and development products intended to be sold but temporarily rented out. Inventory is measured at the actual costs when the fixed assets are obtained. The actual costs of development products include land transfer payment, infrastructure and facility costs, installation engineering costs, borrows before completion of the development and other costs during the development process. The special maintenance funds collected in the first period are included in the development overheads. The actual costs of the development product is priced using the separate pricing method.

(3) Inventory system

The Company inventory adopts the perpetual inventory system, counting at least once a year, the inventory profit and loss amount is included in the current year's profit and loss.

(4) Recognition of inventory realizable value and providing of impairment provision

On the balance sheet date, inventories are accounted depending on which is lower between the cost and the net realizable value. If the cost is higher than the net realizable value, the impairment provision will be made.

The realizable net value of inventory should be recognized based on solid evidence with the purpose of the inventory and after-balance-sheet-date events taken into consideration.

(1) In the course of normal production and operation, the net realizable value of finished goods, commodities and materials directly used for sale shall be determined by the estimated price of the inventory minus the estimated cost of sale and related taxes. The inventory held for the execution of a sales contract or a labor contract shall be measured on the basis of the contract price as its net realizable value; If the quantity held is greater than the quantity ordered under the sales contract, the net realizable value of the excess inventory is measured on the basis of the general sales price. For materials used for sale, the market price shall be used as the measurement basis for the net realizable value.

② In the normal production and operation process, the inventory of materials that need to be processed is determined by the amount of the estimated selling price of the finished product minus the estimated cost to be incurred at the time of completion, estimated sales expenses and related taxes. Realize the net value. If the net realizable value of the finished product produced by it is higher than the cost, the material is measured at cost; If the decrease in the price of the material indicates that the net realizable value of the finished product is lower than the cost, the material is measured as the net realizable value and the inventory is prepared for a decrease based on its difference.

③ Depreciation preparation of inventory is generally based on a single inventory item; For a large number of inventories with a lower unit price, they are accrued by inventory type.

④ If the factors affecting the previous write-down of inventory value have disappeared on the balance sheet date, the amount of the write-down will be restored and transferred back within the amount of inventory depreciation reserve that has been accrued, and the amount returned will be included in the current profit and loss.

(5) Methods of amortization of swing materials

① Low-value consumables are amortized on on-off amortization basis at using.

② Packages are amortized on on-off amortization basis at using.

15. Contract assets

As of 1 January 2020

The Company presents contract assets or liabilities in the balance sheet according to the relationship between performance obligation and customer payment. The consideration for which the Company is entitled to

receive (subject to factors other than the passage of time) for the transfer of goods or the provision of services to customers is listed as contract assets. The Company's obligation to transfer goods or provide services to customers for consideration received or receivable from customers is listed as contractual liabilities.

For the determination method and accounting treatment method of the Company's expected credit loss of contract assets, see 9. Financial instruments in Chapter XII, V. Important accounting policies and accounting estimates.

Contract assets and contract liabilities are listed separately in the balance sheet. Contract assets and contract liabilities under the same contract are listed in net amount. If the net amount is the debit balance, it shall be listed in "contract assets" or "other non current assets" according to its liquidity; if the net amount is the credit balance, it shall be listed in "contract liabilities" or "other non-current liabilities" according to its liquidity. Contract assets and contract liabilities under different contracts cannot offset each other.

16. Contract costs

As of 1 January 2020

Contract cost is divided into contract performance cost and contract acquisition cost.

The cost incurred by the Company in performing the contract shall be recognized as an asset when the following conditions are met simultaneously:

- ① The cost is directly related to a current or expected contract, including direct labor, direct materials, manufacturing expenses (or similar expenses), clearly borne by the customer, and other costs incurred only due to the contract;
- ② This cost increases the Company's future resources for fulfilling its performance obligations.
- ③ The cost is expected to be recovered.

If the incremental cost incurred by the Company to obtain the contract is expected to be recovered, it shall be recognized as an asset as the contract acquisition cost.

The assets related to the contract cost shall be amortised on the same basis as the income from goods or services related to the assets; however, if the amortization period of the contract acquisition cost is less than one year, the Company shall include it in the current profit and loss when it occurs.

If the book value of the assets related to the contract cost is higher than the difference between the following two items, the Company will make provision for impairment for the excess part and recognize it as the loss of asset impairment, and further consider whether the estimated liabilities related to the loss contract should be made:

- ① The residual consideration expected to be obtained due to the transfer of goods or services related to the asset;
- ② The estimated cost to be incurred for the transfer of the relevant goods or services.

If the above provision for impairment of assets is subsequently reversed, the book value of the asset after reversal shall not exceed the book value of the asset on the reversal date without provision for impairment.

The contract performance cost recognized as an asset with an amortization period of no more than one year or one normal business cycle at the time of initial recognition shall be listed in the "inventory" item, and the amortization period of no more than one year or one normal business cycle at the time of initial recognition shall be listed in the "other non current assets" item.

The contract acquisition cost recognized as an asset shall be listed in the item of "other current assets" when the amortization period does not exceed one year or one normal business cycle at the time of initial recognition, and listed in the item of "other non current assets" when the amortization period exceeds one year or one normal business cycle at the time of initial recognition.

17. Long-term share equity investment

The Group's long-term equity investment includes control on invested entities and significant impacts on equity investment. Invested entities on which the Group has significant impacts are associates of the Group.

(1) Basis for recognition of common control and major influence on invested entities

Common control refers to the common control of an arrangement in accordance with the relevant agreement, and the relevant activities of the arrangement must be agreed upon by the participants who share control. In determining whether there is common control, the first step is to determine whether all or a group of participants collectively control the arrangement, which is considered collective control by all or a group of participants if all or a group of participants must act together to determine the activities associated with the arrangement. Secondly, it is judged whether the decision on related activities of the arrangement must be agreed by the participants who collectively control the arrangement. If there is a combination of two or more parties that can collectively control an arrangement, it does not constitute joint control. When judging whether there is joint control, the protective rights enjoyed are not considered.

Major influence refers to the power to participate in decision-making of financial and operation policies of a company, but cannot control or jointly control the making of the policies. When considering whether the Company can impose significant impacts on the invested entity, impacts of conversion of shares with voting rights held directly or indirectly by the investor and voting rights that can be executed in this period held by the investor and other party into shares of the invested entity should be considered.

If the Company directly or through subsidiaries holds more than 20% (inclusive) but less than 50% of the shares with voting rights of the invested entity, unless there is clear evidence proving that the Company cannot participate the decision-making of production and operation of the invested entity, the Company has major influence on the invested entity.

(2) Initial investment cost determination

Long-term equity investments formed by merger of enterprises shall be determined in accordance with the following provisions:

A. In the case of an enterprise merger under the same control, where the merging party makes a valuation of the merger by payment of cash, transfer of non-cash assets or undertaking liabilities, the share of the book value of the owner's interest in the final controlling party's consolidated financial statements as the initial investment cost of the long-term equity investment at the date of the merger. The difference between the initial investment cost of long-term equity investment and the cash paid, the transferred non-cash assets and the book value of the debt assumed shall be adjusted to the capital reserve; if the capital reserve is insufficient to offset, the retained earnings shall be adjusted;

Long-term equity investment generated by enterprise merger: for long-term equity investment obtained by merger of enterprises under common control, the obtained share of book value of the interests of the merged party's owner in the consolidate financial statements on the merger date is costs; for long-term equity investment obtained by merger of enterprises not under common control, the merger cost is the investment cost. Adjust the capital reserve according to the difference between the initial investment cost of long-term equity investment and the total face value of the issued shares. If the capital reserve is insufficient to offset or reduce, the retained income shall be adjusted;

For merger of entities under different control, the merger cost is the fair value of the asset paid, liability undertaken, and equity securities issued for exchanging of control power over the entities at the day of acquisition. Agency expenses and other administrative expenses such as auditing, legal consulting, or appraisal services occurred relating to the merger of entities are accounted into current income account when occurred.

Long-term equity investments formed by merger of enterprises shall be determined in accordance with the following provisions:

For long-term equity investment obtained by cash, the actually paid consideration is the initial investment cost. Initial

investment costs include expenses, taxes and other necessary expenditures directly related to the acquisition of long-term equity investments;

B. Long-term equity investments acquired from the issuance of interest securities are the initial investment costs based on the fair value of the issue interest securities;

C. For long-term equity investments obtained through non-monetary asset exchanges, if the exchange has commercial substance and the fair value of the exchanged assets or exchanged assets can be reliably measured, the fair value of the exchanged assets and relevant taxes shall be used as the initial Investment cost, the difference between the fair value and book value of the swapped-out asset is included in the current profit and loss; if the non-monetary asset exchange does not meet the above two conditions at the same time, the book value of the swapped-out asset and relevant taxes will be used as the initial investment cost.

D. Long-term equity investments acquired through debt restructuring determine their recorded value at the fair value of the waived claims and other costs such as taxes directly attributable to the assets and account for the difference between the fair value and the book value of the waived claims.

(3) Subsequent measurement and recognition of gain/loss

The Company uses the cost method to measure long-term share equity investment in which the Company can control the invested entity; and uses the equity method to measure long-term share equity investment in which the Company has substantial influence on the invested entity.

① Cost

For the long-term equity investment measured on the cost basis, except for the announced cash dividend or profit included in the practical cost or price when the investment was made, the cash dividends or profit distributed by the invested entity are recognized as investment gains in the current gain/loss account.

Equity

Gains from long-term equity investment measured by equity

When the equity method is used to measure long-term equity investment, the investment cost will not be adjusted if the investment cost of the long-term equity investment is larger than the share of fair value of the recognizable assets of the invested entity. When it is smaller than the share of fair value of the recognizable assets of the invested entity, the book value will be adjusted and the difference is included in the current gains of the investment.

When the equity method is used, the current investment gain is the share of the net gain realized in the current year that can be shared or borne, recognized as investment gain and other misc. income. The book value of the long-term equity investment is adjusted accordingly. The book value of the long-term equity investment should be accordingly decreased based on the share of profit or cash dividend announced by the invested entity; according to other changes in the owner's equity except for net profit and loss, other misc income and profit distribution of the invested entity, adjust the book value of the long-term equity investment and record it in the capital surplus (other capital surplus). When the share of the net gains that can be enjoyed is recognized, it is recognized after the net profit of the invested entity is adjusted based on the fair value of the recognizable assets of the invested entity according to the Company's accounting policies and accounting period. Where the accounting policy and accounting period adopted by the Invested unit are inconsistent with the Company, the financial statements of the Invested unit shall be adjusted in accordance with the accounting policy and accounting period of the Company, and the investment income and other consolidated income shall be recognized. Internal transaction gain not realized between the Company and affiliates is measured according to the shareholding proportion and the investment gains is recognized after deduction. The unrealized internal transaction loss between the Company and the invested entity is the impairment loss of transferred assets and should not be written off.

Where substantial influence on invested entities is imposed or joint control is implemented due to increase

in investment, the sum of the fair value of the original equity and increased investment on the conversion date is the initial investment cost under the equity method. If the equity investment originally held is classified as other equity instrument investment, the difference between the fair value and the book value, as well as the accumulated gains or losses originally included in other comprehensive income, shall be transferred out of other comprehensive income and included in retained income in the current period when the equity method is adopted.

Where joint control or substantial influence on invested entities is lost due to disposal of part of investment, the remaining equity after the disposal should be treated according to the Enterprise Accounting Standard No. 22 - Recognition and Measurement of Financial Instruments from the date of losing the joint control or substantial influence. The difference between the fair value and book value should be accounted the profit and loss of the current period. For other misc. incomes of original share equity investment determined using the equity method, when the equity method is no longer used, it should be treated based on the same basis of the treatment of related assets or liability of the invested entities; the other owners' interests related to the original share equity investment should be transferred to gain/loss of the current period.

(4) Equity investment held for sale

For the remaining equity investments not classified as assets held for sale, the equity method is adopted for accounting treatment.

Equity investments classified as held for sale to associates that are no longer eligible to hold classified assets for sale are retrospectively adjusted using the equity method starting from the date that they are classified as held for sale. The classification is adjusted to hold the financial statements for the period to be sold.

(5) Impairment examination and providing of impairment provision

See Note V. 24 for the assets impairment provision method for investment in subsidiaries and joint ventures.

XVIII. Investment real estates

(1) Classification of investment real estate

Investment real estates are held for rent or capital appreciation, or both. These include, inter alia:

- ① Leased land using right
- (2) the right to use the land that is transferred after holding and preparing for the increment.
- ③ Leased building

(2) Measurement of investment real estate

For investment real estates with an active real estate transaction market and the Company can obtain market price and other information of same or similar real estates to reasonably estimate the investment real estates' fair value, the Company will use the fair value mode to measure the investment real estates subsequently. Variations in fair value are accounted into the current gain/loss account.

The fair value of investment real estates is determined with reference to the current market prices of same or similar real estates in active markets; when no such price is available, with reference to the recent transaction prices and consideration of factors including transaction background, date and district to reasonably estimate the fair value; or based on the estimated lease gains and present value of related cash flows.

For investment real estate under construction (including investment real estate under construction for the first time), if the fair value cannot be reliably determined but the expected fair value of the real estate after completion is continuously and reliably obtained, the investment real estate under construction is measured by cost. When the fair value can be measured reliably or after completion (the earlier one), it is measured at fair

value. For an investment real estate whose fair value is proven unable to be obtained continuously and reliably by objective evidence, the real estate will be measured at cost basis until it is disposed and no residual value remains as assumed.

If the cost model is adopted to measure the investment real estate, the depreciation or amortization shall be calculated according to the straight line method after deducting the accumulated impairment and net residual value of the investment real estate cost. For the method of depreciation of the accrued assets, see Note V 24.

The types of investment real estate, estimated economic useful life and estimated net residual value rate are determined as follows:

Type	Service year (year)	Residual rate %	Annual depreciation rate %
Houses & buildings	35-50	10	1.80-2.57

19. Fixed assets

(1) Recognition conditions

Fixed assets is defined as the tangible assets which are held for the purpose of producing goods, providing services, lease or for operation & management, and have more than one accounting year of service life. Fixed assets are recognized at the actual cost of acquisition when the following conditions are met: (1) The economic benefits associated with the fixed assets are likely to flow into the enterprise. (2) The cost of the fixed assets can be measured reliably. Overhaul cost generated by regular examination on fixed assets is recognized as fixed assets costs when there is evidence proving that it meets fix assets recognition conditions. If not, it will be accounted into the current gain/loss account.

(2) Depreciation method

Type	Depreciation method	Service year	Residual rate	Annual depreciation rate %
Houses & buildings	Average age	35-50	10%	1.8%-2.57%
Mechanical equipment	Average age	10	10%	9%
Transportation facilities	Average age	5	10%	18%
Electronics and other devices	Average age	5	10%	18%
PV power plants	Average age	20	5%	4.75%

(3) Recognition and pricing of financing leased fixed assets

See Chapter V, Important Accounting Policies and Accounting Estimates 33. Lease.

XX. Construction in process

- (1) Construction in progress is accounted for by project classification.
- (2) Standard and timing for transferring construction in process into fixed assets

The full expenditure incurred on the construction-in-progress project as a fixed asset is recorded as the value of the asset before the asset is constructed to the intended usable state. This includes construction costs, the original cost of equipment, other necessary expenditures incurred in order to enable the construction works to reach the intended usable status and the borrowing costs incurred for the specific borrowing of the project and the general borrowing expenses incurred before the assets reach the intended usable status. Construction in process will be transferred to fixed assets when it reaches the preset service condition. The fixed assets that have reached the intended usable state but have not been completed shall be transferred to the fixed assets according to the estimated value according to the estimated value according to the estimated value according to the project budget, cost or actual project cost, etc. The depreciation of the fixed assets shall be accrued according to the Company's fixed assets depreciation policy. The original estimated value shall be adjusted according to the actual cost after the completion.

XXI. Borrowing expenses

(1) Recognition principles for capitalization of borrowing expenses

Borrowing expenses occurred to the Company that can be accounted as purchasing or production of asset satisfying the conditions of capitalizing, are capitalized and accounted as cost of related asset.

(1) Asset expenditure has occurred;

② The borrowing expense has already occurred;

③ Purchasing or production activity, which is necessary for the asset to reach the useful status, has already started.

Other interest on loans, discounts or premiums and exchange differences are included in the income and loss incurred in the current period.

If the construction or production of assets satisfying the capitalizing conditions is suspended abnormally for over 3 months, capitalizing of borrowing expenses shall be suspended. During the normal suspension period, borrowing expenses will be capitalized continuously.

When the asset satisfying the capitalizing conditions has reached its usable or sellable status, capitalizing of borrowing expenses shall be terminated.

(2) Calculation of the capitalization amount of borrowing expense

Interest expenses generated by special borrowings less the interests income obtained from the deposit of unused borrowings or investment gains from temporary investment is capitalized; the capitalization amount for general borrowing is determined based on the capitalization rate which is the exceeding part of the accumulative assets expense over weighted average of the assets expense of the special borrowing/used general borrowing. If the assets that are constructed or produced under the condition of capitalization occupy the general borrowing, the interest amount to be capitalized in the general borrowing shall be calculated and determined by multiplying the capital rate of the general borrowing by the weighted average of the asset expenditure of the accumulated assets whose expenditure exceeds that of the specialized borrowing. The capitalization ratio is the weighted average interest rate of general borrowings.

22. Use right assets

See Chapter XI, V, Important Accounting Policies and Accounting Estimates 33. Lease.

23. Intangible assets

(1) Pricing method, service life and depreciation test

(1) Pricing of intangible assets

Recorded at the actual cost of acquisition.

Amortization of intangible assets

① Useful life of intangible assets with limited useful life

Item	Estimated useful life	Basis
Land using right	Term	Use right assets
Trademarks and patents	10 years	Reference to determine the lifetime of a company for which it can bring economic benefits
Proprietary technology	10 years	Reference to determine the lifetime of a company for which it can bring economic benefits
Software	5, 10 years	Reference to determine the lifetime of a company for which it can bring economic benefits

At the end of each year, the Company will reexamine the useful life and amortization basis of intangible assets with limited useful life. Upon review, the service life and amortization methods of intangible assets at the end of the period are not different from those previously estimated.

(2) Intangible assets which cannot be foreseeable to bring economic benefits to enterprises shall be regarded as intangible assets whose useful life is uncertain. For intangible assets with uncertain service life, the Company reviews the service life of intangible assets with uncertain service life at the end of each year. If it is still uncertain after rechecking, it shall conduct an impairment test on the balance sheet date.

③ Amortization of intangible assets

For intangible assets with limited service life, the Company shall determine their service life at the time of acquisition, and shall use the straight line method system to reasonably amortize their service life, and the amortization amount shall be included in the profit and loss of the current period according to the beneficial items. The specific amortization amount is the amount after the cost is deducted from the estimated residual value. For fixed assets for which depreciation provision is made, the depreciation rate will be determined after the accumulative depreciation provision amount is deducted. The residual value of an intangible asset with limited useful life is treated as zero, except where a third party undertakes to purchase the intangible asset at the end of its useful life or to obtain expected residual value information based on the active market, which is likely to exist at the end of its useful life.

Intangible assets with uncertain service life will not be amortized. At the end of each year, the useful life of intangible assets with uncertain useful life is reviewed, and if there is evidence that the useful life of intangible assets is limited, the useful life is estimated and the system is reasonably amortized within the expected useful life.

(2) Accounting policies for internal R&D expenses

Specific standard for distinguish between research and development stage

① The Company takes the information and related preparatory activities for further development activities as the research stage, and the intangible assets expenditure in the research stage is included in the current

profit and loss period.

② The development activities carried out after the Company has completed the research stage as the development stage.

Specific conditions for capitalization of expenditures in the development phase

Expenditures in the development phase can be recognized as intangible assets only when the following conditions are met:

A. It is technically feasible to complete the intangible asset so that it can be used or sold;

B. Have the intention to complete the intangible asset and use or sell it;

C. The way intangible assets generate economic benefits, including the ability to prove that the products produced by the intangible assets exist in the market or the intangible assets themselves exist in the market, and the intangible assets will be used internally, which can prove their usefulness;

D. Have sufficient technical, financial and other resource support to complete the development of the intangible asset, and have the ability to use or sell the intangible asset;

E. The expenditure attributable to the development stage of the intangible asset can be reliably measured.

24. Assets impairment

The Group uses the cost mode to continue measuring the assets impairment to investment real estate, fixed assets construction in progress, intangible assets and goodwill (except for the inventories, investment real estate measured by the fair value mode, deferred income tax assets and financial assets). The method is determined as follows:

The Company judges whether there is a sign of impairment to assets on the balance sheet day. If such sign exists, the Company estimates the recoverable amount and conducts the impairment test. Impairment test is conducted annually for goodwill generated by mergers and intangible assets that have not reached the useful condition no matter whether the impairment sign exists.

The recoverable amount is determined by the higher of the net of fair value minus disposal expense and the present value of the predicted future cash flow. The Company estimates the recoverable amount on the individual asset item basis; whether it is hard to estimate the recoverable amount on the individual asset item basis, determine the recoverable amount based on the asset group that the assets belong to. The assets group is determined by whether the main cash flow generated by the Group is independent from those generated by other assets or assets groups.

When the recoverable amount of the assets or assets group is lower than its book value, the Company writes down the book value to the recoverable amount, the write-down amount is accounted into the current income account and the assets impairment provision is made.

For goodwill impairment test, the book value of goodwill generated by mergers is amortized through reasonable measures since the purchase day to related asset groups; those cannot be amortized to related assets groups are amortized to related combination of asset groups. The related asset groups or combination of asset groups refer to those that can benefit from the synergistic effect of mergers and must not exceed to the reporting range determined by the Company.

When the impairment test is conducted, if there is sign of impairment to the asset group or combination of asset groups related to goodwill, first perform impair test for asset group or combination of asset groups without goodwill and calculate the recoverable amount and recognize the related impairment loss. Then conduct impairment test on those with goodwill, compare the book value with recoverable amount. If the recoverable amount is lower than the book value, recognize the impairment loss of the goodwill.

Once recognized, the asset impairment loss cannot be written back in subsequent accounting period.

25. Long-term amortizable expenses

The long-term outstanding expenses shall be accounted for all expenses incurred by the Company but which shall be borne by the current and future periods for more than one year, and the long-term outstanding expenses shall be amortized averagely within the benefit period.

26. Contract liabilities

See 15. Contract assets in Chapter V, V. Important Accounting Policies and Accounting Estimates for details.

27. Staff remuneration

(1) Accounting of operational leasing

① Basic salary of employees (salary, bonus, allowance, subsidy)

In the accounting period for which the staff and workers provide services, the Company shall confirm the actual short-term remuneration as liabilities and shall account for the current income and loss, except as required or permitted by other accounting standards.

② Employee welfare

The employee benefits incurred by the Company shall be included in the current profit and loss or related asset costs according to the actual amount incurred. Where the employee's benefit is non-monetary, it shall be measured on the basis of fair value.

③ Social insurance premiums and housing accumulation funds such as health insurance premiums, work injury premiums, birth insurance premiums, trade union funds and staff and education funds

The Company pays the medical insurance premiums, work injury insurance premiums, birth insurance premiums, etc. social insurance premiums and housing accumulation funds for the staff and workers, as well as the union funds and the staff and workers education funds according to the regulations, in the accounting period for which the staff and workers provide services, the corresponding salary amount of the staff and workers, and confirms the corresponding liabilities, which are included in the current profit and loss or related asset costs.

④ Short-term paid leave

The Company accumulates the salary of the employees who are absent from work with pay when the employees provide service, thus increasing their future right of absence with pay. The Company confirms the salary of the employee related to the absence of non-cumulative salary during the actual absence accounting period.

⑤ Short-term profit share program

If the profit-sharing plan meets the following conditions at the same time, the Company shall confirm the salary payable to the staff and workers:

- A. The legal or presumptive obligation of the enterprise to pay the remuneration of its employees as a result of past matters;
- B. The amount of employee compensation obligations due to the profit sharing plan can be reliably estimated.

(2) Accounting of post-employment welfare

The Group's post-employment benefit plan is defined contribution plan. Defined contribution plans include basic endowment insurance, unemployment insurance, etc. During the accounting period when employees provide services

for them, the Company shall recognize the deposit amount calculated according to the defined deposit plan as liabilities and include it in the current profits and losses or related asset costs.

(3) Accounting of dismiss welfare

If the Company provides termination benefits to employees, the employee compensation liabilities arising from the termination benefits shall be recognized at the earliest of the following two and shall be included in the current profit and loss:

- ① An enterprise may not unilaterally withdraw the resignation benefits provided for by the dismissal plan or reduction proposal;
- ② When the enterprise recognizes the costs or expenses related to the reorganization involving the payment of resignation benefits.

(4) Accounting of other long-term staff welfare

28. Lease liabilities

See Chapter XI, V, Important Accounting Policies and Accounting Estimates 33. Lease.

29. Anticipated liabilities

(1) Confirmation of projected liabilities

When responsibilities occurred in connection to contingent issues, and all of the following conditions are satisfied, they are recognized as expectable liability in the balance sheet:

- ① This responsibility is a current responsibility undertaken by the Company;
- ② Execution of this responsibility may cause financial benefit outflow from the Company;
- ③ Amount of the liability can be reliably measured.

(2) Methods of measurement of projected liabilities

Expected liabilities are initially measured at the best estimation on the expenses to exercise the current responsibility, and with considerations to the relative risks, uncertainty, and periodic value of currency. On each balance sheet date, review the book value of the estimated liabilities. Where there is conclusive evidence that the book value does not reflect the current best estimate, the book value is adjusted to the current best estimate.

30. Revenue

The Company must comply with disclosure requirements of the Shenzhen Stock Exchange Industry Information Disclosure Guideline No.6 – Listed Companies Engaged in Decoration Business.

As of 1 January 2020

(1) General principles

Income is the total inflow of economic benefits formed in the daily activities of the Company, which will lead to the increase of shareholders' equity and has nothing to do with the capital invested by shareholders.

The Company has fulfilled the performance obligation in the contract, that is, the revenue is recognized

when the customer obtains the control right of relevant goods. To obtain the control right of the relevant commodity means to be able to dominate the use of the commodity and obtain almost all the economic benefits from it.

If there are two or more performance obligations in the contract, the Company will allocate the transaction price to each single performance obligation according to the relative proportion of the separate selling price of the goods or services promised by each single performance obligation on the start date of the contract, and measure the income according to the transaction price allocated to each single performance obligation.

The transaction price refers to the amount of consideration that the Company is expected to be entitled to receive due to the transfer of goods or services to customers, excluding the amount collected on behalf of a third party. When determining the contract transaction price, if there is a variable consideration, the Company shall determine the best estimate of the variable consideration according to the expected value or the most likely amount, and include it in the transaction price with the amount not exceeding the accumulated recognized income when the relevant uncertainty is eliminated, which is most likely not to have a significant reversal. If there is a significant financing component in the contract, the Company will determine the transaction price according to the amount payable in cash when the customer obtains the control right of the commodity. The difference between the transaction price and the contract consideration will be amortised by the effective interest method during the contract period. If the interval between the control right transfer and the customer's payment is less than one year, the Company will not consider the financing component Points.

If one of the following conditions is met, the performance obligation shall be performed within a certain period of time; otherwise, the performance obligation shall be performed at a certain point of time:

- ① When the customer performs the contract in the Company, he obtains and consumes the economic benefits brought by the Company's performance;
- ② Customers can control the goods under construction during the performance of the contract;
- ③ The goods produced by the Company in the process of performance have irreplaceable uses, and the Company has the right to collect money for the performance part that has been completed so far during the whole contract period.

For the performance obligations performed within a certain period of time, the Company shall recognize the revenue according to the performance progress within that period, except that the performance progress cannot be reasonably determined. The Company determines the performance schedule of providing services according to the input method. When the progress of performance cannot be reasonably determined, if the cost incurred by the Company is expected to be compensated, the revenue shall be recognized according to the amount of cost incurred until the progress of performance can be reasonably determined.

For the performance obligation performed at a certain time point, the Company recognizes the revenue at the time point when the customer obtains the control right of relevant goods. In determining whether a customer has acquired control of goods or services, the Company will consider the following signs:

- ① The Company has the right to receive payment for the goods or services, that is, the customer has the obligation to pay for the goods;
- ② The Company has transferred the legal ownership of the goods to the customer, that is, the customer has the legal ownership of the goods;
- ③ The Company has transferred the goods in kind to the customer, that is, the customer has possessed the goods in kind;
- ④ The Company has transferred the main risks and rewards of the ownership of the goods to the customer, that is, the customer has obtained the main risks and rewards of the ownership of the goods;
- ⑤ The product has been accepted by the customer.

Sales return clause

For the sales with sales return clauses, when the customer obtains the control right of the relevant goods, the Company shall recognize the revenue according to the amount of consideration it is entitled to obtain due to the transfer of the goods to the customer, and recognize the amount expected to be returned due to the sales return as the estimated liability; at the same time, the Company shall deduct the estimated cost of recovering the goods according to the book value of the expected returned goods at the time of transfer (The balance after deducting the value of the returned goods is recognized as an asset, that is, the cost of return receivable, which is carried forward by deducting the net cost of the above assets according to the book value of the transferred goods at the time of transfer. On each balance sheet date, the Company re estimates the return of future sales and re measures the above assets and liabilities.

Warranty obligations

According to the contract and legal provisions, the Company provides quality assurance for the goods sold and the projects constructed. For the guarantee quality assurance to ensure that the goods sold meet the established standards, the Company conducts accounting treatment in accordance with the accounting standards for Business Enterprises No. 13 - contingencies. For the service quality assurance which provides a separate service in addition to guaranteeing that the goods sold meet the established standards, the Company takes it as a single performance obligation, allocates part of the transaction price to the service quality assurance according to the relative proportion of the separate selling price of the goods and service quality assurance, and recognizes the revenue when the customer obtains the service control right. When evaluating whether the quality assurance provides a separate service in addition to assuring customers that the goods sold meet the established standards, the Company considers whether the quality assurance is a statutory requirement, the quality assurance period, and the nature of the Company's commitment to perform the task.

Customer consideration payable

If there is consideration payable to the customer in the contract, unless the consideration is to obtain other clearly distinguishable goods or services from the customer, the Company will offset the transaction price with the consideration payable, and offset the current income at the later time of confirming the relevant income or paying (or promising to pay) the customer's consideration.

Contractual rights not exercised by customers

If the Company advances sales of goods or services to customers, the amount shall be recognized as liabilities first, and then converted into income when relevant performance obligations are fulfilled. When the Company does not need to return the advance payment and the customer may give up all or part of the contract rights, if the Company expects to have the right to obtain the amount related to the contract rights given up by the customer, the above amount shall be recognized as income in proportion according to the mode of the customer exercising the contract rights; otherwise, the Company only has the very low possibility of the customer requiring to perform the remaining performance obligations. The relevant balance of the above liabilities is converted into income.

Contract change

When the construction contract between the Company and the customer is changed:

① If the contract change increases the clearly distinguishable construction service and contract price, and the new contract price reflects the separate price of the new construction service, the Company will treat the contract change as a separate contract for accounting;

② If the contract change does not belong to the above-mentioned situation (1), and there is a clear distinction between the transferred construction service and the non transferred construction service on the date of contract change, the Company will regard it as the termination of the original contract, and at the same time, combine the non performance part of the original contract and the contract change part into a new contract for accounting treatment;

③ If the contract change does not belong to the above situation (1), and there is no clear distinction between the transferred construction services and the non transferred construction services on the date of contract change, the Company will take the contract change part as an integral part of the original contract for accounting treatment, and the resulting impact on the recognized income will be adjusted to the current income on the date of contract change.

(2) Specific methods

The specific methods of revenue recognition of the Company are as follows:

① Commodity sales contract

The sales contract between the Company and customers includes the performance obligation of transferring curtain wall materials, electric energy, etc., which belongs to the performance obligation at a certain time point.

Revenue from domestic sales of products is recognized at the time when the customer obtains the right of control of the goods on the basis of comprehensive consideration of the following factors: the Company has delivered the products to the customer according to the contract, the customer has accepted the goods, the payment for goods has been recovered or the receipt has been obtained, and the relevant economic benefits are likely to flow in, the main risks and rewards of the ownership of the goods have been transferred, the legal ownership has been transferred;

Based on the comprehensive consideration of the following factors, the revenue of export products is recognized at the time when the customer obtains the control of the goods: the Company has declared the products according to the contract, obtained the bill of lading, collected the payment for goods or obtained the receipt certificate, and the relevant economic benefits are likely to flow in, the main risks and rewards of the ownership of the goods have been transferred, and the legal ownership of the goods has been transferred.

② Service contract

The service contract between the Company and its customers includes the performance obligations of metro platform screen door operation and maintenance and property services. As the Company's performance at the same time, the customers obtain and consume the economic benefits brought by the Company's performance, the Company takes it as the performance obligation within a certain period of time and allocates it equally during the service provision period.

③ Engineering contract

The project contract between the Company and the customer includes the performance obligations of curtain wall project and metro platform screen door project construction. As the customer can control the goods under construction in the process of the Company's performance, the Company takes them as the performance obligations within a certain period of time, and recognizes the income according to the performance progress, except that the performance progress cannot be reasonably determined. The Company determines the performance schedule of providing services according to the input method. The performance schedule shall be determined according to the proportion of the actual contract cost to the estimated total contract cost. On the balance sheet date, the Company re estimates the progress of completed or completed services to reflect the changes in performance.

④ Real estate sales contract

The income of the Company's real estate development business is recognized when the control of the property is transferred to the customer. Based on the terms of the sales contract and the legal provisions applicable to the contract, the control of the property can be transferred within a certain period of time or at a certain point in time. Only if the goods produced by the Company during the performance of the contract have irreplaceable uses, and the Company has the right to collect payment for the cumulative performance part that has been completed during the entire contract period, the performance obligation has been completed during the contract period.

The progress is recognized as revenue within a period of time, and the progress of the completed performance obligations is determined in accordance with the ratio of the contract costs actually incurred to complete the performance obligations to the estimated total cost of the contract. Otherwise, the income is recognized when the customer obtains the physical ownership or legal ownership of the completed property and the Company has obtained the current right of collection and is likely to recover the consideration. When confirming the contract transaction price, if the financing component is significant, the Company will adjust the contract commitment consideration according to the financing component of the contract.

31. Government subsidy

(1) Recognition of government subsidies

Government subsidies are recognized when the following conditions are met:

- ① Requirements attached to government subsidies;
- ② The Company can receive government subsidies.

(2) Recognition of government subsidies

When a government subsidy is monetary capital, it is measured at the received or receivable amount. None monetary capital are measured at fair value; if no reliable fair value available, recognized at RMB1.

(3) Recognition of government subsidies

① Assets-related

Government subsidies related to assets are obtained by the Company to purchase, build or formulate in other manners long-term assets; or subsidies related to benefits. If the asset-related government subsidy is recognized as deferred gain, should be recorded in gain and loss in the service life. Government subsidy measured at the nominal amount is accounted into current income account. If the relevant assets are sold, transferred, scrapped or damaged before the end of their useful life, the unallocated relevant deferred income balance shall be transferred to the profit and loss of the current period of disposition of the assets.

Gain-related government subsidy should be accounted as follows:

The Company divides government subsidies into assets-related and earnings-related government subsidies. Gain-related government subsidy should be accounted as follows:

Subsidy that will be used to compensate related future costs or losses should be recognized as deferred gain and recorded in the gain and loss of the current report and offset related cost;

Subsidy that is used to compensate existing cost or loss should be recorded in the gain and loss of the current period or offset related cost.

For government subsidies that include both asset-related and income-related parts, separate different parts for accounting treatment; It is difficult to distinguish between the overall classification of government subsidies related to benefits.

Government subsidy related to routine operations should be recorded in other gains or offset related cost. Government subsidy not related to routine operations should be recorded in non-operating income or expense.

③ Policy preferential loan discount

The policy-based preferential loan obtained has interest subsidy. If the government allocates the interest-subsidy funds to the lending bank, the loan amount actually received will be used as the entry value of the loan, and the borrowing cost will be calculated based on the loan principal and policy-based preferential interest rate.

If the government allocates the interest-bearing funds directly to the Group, discount interest will offset the borrowing costs.

④ Government subsidy refund

When a confirmed government subsidy needs to be returned, the book value of the asset is adjusted against the book value of the relevant asset at initial recognition. If there is a related deferred income balance, the book balance of the related deferred income is written off and the excess is credited to the current profit or loss; In other cases, it is directly included in the current profit and loss.

32. Differed income tax assets and differed income tax liabilities

The Company uses the temporary difference between the book value of the assets and liabilities on the balance sheet day and the tax base and the liabilities method to recognize the deferred income tax. 26. Deferred income tax assets and deferred income tax liabilities

(1) Deferred income tax assets

For deductible temporary discrepancies, deductible losses and tax offsets that can be carried forward for future years, the impact on income tax is calculated at the estimated income tax rate for the transfer-back period and the impact is recognized as deferred income tax assets, provided that the Company is likely to obtain future taxable income for deductible temporary discrepancies, deductible losses and tax offsets.

At the same time, the impact on income tax of deductible temporary discrepancies resulting from the initial recognition of assets or liabilities in transactions or matters with the following characteristics is inconclusive as deferred income tax assets:

A. The transaction is not a business combination;

B. the transaction is not a merger and the transaction does not affect the accounting profit or taxable proceeds;

In the event of temporary discrepancy of deductible investment related to subsidiaries, joint ventures and joint ventures, and meeting the following two conditions, the amount of impact (talent) on income tax shall be deemed as deferred income tax assets:

A. Temporary discrepancies are likely to be reversed in the foreseeable future;

B. In the future, it is likely to obtain taxable income that can be used to offset the deductible temporary differences;

On the balance sheet date, if there is conclusive evidence that sufficient taxable income is likely to be obtained in the future to offset the deductible temporary differences, the deferred income tax assets that have not been recognized in the previous period are recognized.

On the balance sheet day, the Company re-examines the book value of the deferred income tax assets. If it is unlikely to have adequate taxable proceeds to reduce the benefits of the deferred income tax assets, less the deferred income tax assets' book value. When there is adequate taxable proceeds, the lessened amount will be reversed.

(2) Deferred income tax assets

All provisional differences in taxable income of the Company shall be measured on the basis of the estimated income tax rate for the period of transfer-back and shall be recognized as deferred income tax liabilities, except that:

At the same time, the impact on income tax of deductible temporary discrepancies resulting the initial recognition of assets or liabilities in transactions or matters with the following characteristics is inconclusive as deferred income tax Liabilities:

A. Initial recognition of goodwill;

B. Initial recognition of goodwill, or of assets or liabilities generated in transactions with the following features: the transaction is not a merger and the transaction does not affect the accounting profit or taxable proceeds;

② In the event of temporary discrepancy of deductible investment related to subsidiaries, Joint venture

joint ventures, and meeting the two conditions, the amount of impact (talent) on income tax shall be deemed as deferred income tax assets:

A. The Company is able to control the time of temporary discrepancy transfers;

B Temporary discrepancies are likely to be reversed in the foreseeable future;

(3) Deferred income tax assets

(1) Deferred income tax liabilities or assets associated with enterprise consolidation

Temporary difference of taxable tax or deductible temporary difference generated by enterprise merger under non-same control. When deferred income tax liability or deferred income tax asset is recognized, related deferred income tax expense (or income) is usually adjusted as recognized goodwill in enterprise merger.

② Amount of shares paid and accounted as owners' equity

Except for the adjustment goodwill generated by mergers or deferred income tax related to transactions or events directly accounted into the owners' equity, income tax is accounted as income tax expense into the current gain/loss account. The effects of temporary discrepancy on income tax include the following: Other integrated benefits such as fair value change of financial assets available for sale, retroactive adjustment of accounting policy changes or retroactive restatement of accounting error correction discrepancy to adjust the initial retained income, and mixed financial instruments including liabilities and equity.

③ Compensation for losses and tax deductions

A. Compensable losses and tax deductions from the Company's own operations

Deductible losses refer to the losses calculated and determined in accordance with the provisions of the tax law that are allowed to be made up with the taxable income of subsequent years. The uncovered losses (deductible losses) and tax deductions that can be carried forward in accordance with the tax law are treated as deductible temporary differences. When it is expected that sufficient taxable income is likely to be obtained in the future period when it is expected to be available to make up for losses or tax deductions, the corresponding deferred income tax assets are recognized within the limit of the taxable income that is likely to be obtained, while reducing the current period Income tax expense in the income statement.

B. Compensable uncovered losses of the merged company due to business merger

In a business combination, if the Company obtains the deductible temporary difference of the purchased party and does not meet the deferred income tax asset recognition conditions on the purchase date, it shall not be recognized. Within 12 months after the purchase date, if new or further information is obtained indicating that the relevant conditions on the purchase date already exist, and the economic benefits brought about by the temporary difference are expected to be deducted on the purchase date, confirm the relevant delivery. Deferred income tax assets, while reducing goodwill, if the goodwill is not enough to offset, the difference is recognized as the current profit and loss; except for the above circumstances, the deferred tax assets related to the business combination are recognized and included in the current profit and loss.

④ Temporary difference caused by merger offset

If there is a temporary difference between the book value of assets and liabilities in the consolidated balance sheet and the taxable basis of the taxpayer due to the offset of the unrealized internal sales gain or loss, the deferred income tax asset or the deferred income tax liability is confirmed in the consolidated balance sheet, and the income tax expense in the consolidated profit statement is adjusted, with the exception of the deferred income tax related to the transaction or event directly included in the owner's equity and the merger of the enterprise.

⑤ Share payment settled by equity

If the tax law provides for allowable pre-tax deduction of expenses related to share payment, within the period for which the cost and expense are recognized in accordance with the accounting standards, the Company shall calculate the tax basis and temporary discrepancy based on the estimated pre-tax deduction amount at the end

of the accounting period and confirm the relevant deferred income tax if it meets the conditions for confirmation. Of these, the amount that can be deducted before tax in the future exceeds the cost related to share payment recognized in accordance with the accounting standards, and the excess income tax shall be directly included in the owner's equity.

33. Leasing

(1) The Company as lessee

The Company recognizes the right to use assets and lease liabilities for the lease on the beginning date of the lease term. The right of use assets are initially measured at cost, including the initial measurement amount of lease liabilities, the lease payment paid on or before the beginning of the lease term (deducting the amount related to the enjoyed lease incentives), the initial direct expenses incurred, and the costs incurred for dismantling and removing the leased assets, the estimated cost of restoring the site where the leased asset is located or restoring the leased asset to the state agreed in the lease terms.

The Company depreciates the right of use assets using the straight-line method. If it can be reasonably determined that the ownership of the leased asset is obtained at the expiration of the lease term, the Company shall accrue depreciation within the remaining service life of the leased asset. Otherwise, the leased asset is depreciated within the shorter of the lease term and the remaining service life of the leased asset. The impairment provision for right of use assets shall be accrued according to the accounting policies described in note V. 24.

The lease liabilities are initially measured according to the present value of the unpaid lease payments at the beginning of the lease term, and the discount rate is the interest rate embedded in the lease. If the embedded interest rate of the lease cannot be determined, the incremental loan interest rate of the Company shall be used as the discount rate.

The Company calculates the interest expense of the lease liability in each period of the lease term according to the fixed periodic interest rate and records it into the current profit and loss or relevant asset cost. The amount of variable lease payments not included in the measurement of lease liabilities shall be included in the current profits and losses or relevant asset costs when actually incurred.

After the beginning date of the lease term, in case of the following circumstances, the Company shall re-measure the lease liabilities according to the present value of the lease payment after the change:

- Changes in the expected payable amount according to the guarantee residual value;
- Changes in the index or ratio used to determine the amount of lease payments;
- The Company's appraisal results of purchase option, renewal option or termination option have changed, or the actual exercise of renewal option or termination option is inconsistent with the original appraisal results.

When the lease liabilities are remeasured, the Company adjusts the book value of the right to use assets accordingly. If the book value of the right of use asset has been reduced to zero, but the lease liability still needs to be further reduced, the Company shall record the remaining amount into the current profit and loss.

The Company has chosen not to recognize the right to use assets and lease liabilities for short-term leases (leases with a lease term of no more than 12 months) and low-value asset leases, and the relevant lease payments are included in the current profit and loss or relevant asset costs according to the straight-line method in each period of the lease term.

(2) The Company is the lessor

On the lease commencement date, the Company divides the lease into financial lease and operating lease. The company does not have financial leasing.

When the Company is the operating lessor, the rent received shall be recognized as income within the lease

term by the straight line method. Where the lessor provides a lease-free period, the total rent shall be apportioned within the whole lease-free period without deducting the lease-free period according to the straight line method or other reasonable method, and the rent-free period shall be recognized as well as the corresponding liabilities. If the charterer undertakes certain expenses, the Company shall distribute the rent income balance deducted from the total rent income during the lease term.

Initial direct expenses are recorded to current income account. Larger amounts shall be capitalized and included in current profits and losses in installments on the same basis as the confirmed rental income during the entire operating lease period. In the event of an agreement or rent, the current profit and loss shall be included in the actual occurrence.

34. Other significant accounting policies and estimates

(1) Measurement of Fair Value

Fair value refers to the amount of asset exchange or liabilities settlement by both transaction parties familiar with the situation in a fair deal on a voluntary basis.

The Company measures the fair value of related assets or liabilities at the prices in the main market. If there is no major market, the Company measures the fair value of the relevant assets or liabilities at the most favorable market prices. The Group uses assumptions that market participants use to maximize their economic benefits when pricing the asset or liability.

The main market refers to the market with the highest transaction volume and activity of the related assets or liabilities. The most favorable market means the market that can sell the related assets at the highest amount or transfer the related liabilities at the lowest amount after considering the transaction cost and transportation cost.

For financial assets or liabilities in an active market, The Company determines their fair value based on quotations in the active market. If there is no active market, the Company uses evaluation techniques to determine the fair value.

For the measurement of non-financial assets at fair value, the ability of market participants to use the assets for optimal purposes to generate economic benefits, or the ability to sell the assets to other market participants that can be used for optimal purposes to generate economic benefits.

① Valuation technology

The Company adopts valuation techniques that are applicable in the current period and are supported by sufficient data and other information. The valuation techniques used mainly include market method, income method and cost method. The Company uses a method consistent with one or more of the valuation techniques to measure fair value. If multiple valuation techniques are used to measure fair value, the reasonableness of each valuation result shall be considered, and the fair value shall be selected as the most representative of fair value under the current circumstances. The amount of value is regarded as fair value.

The The Company equipment are applicable in the current circumstances and have sufficient available data and other information to support the use of the relevant observable input values prioritized. Unobservable input values are used only when the observable input value cannot be obtained or is not feasible. Observable input values are input values that can be obtained from market data. The Group uses assumptions that market participants use to maximize their economic benefits when pricing the asset or liability. Non-observable input values are input values that cannot be obtained from market data. The input value is obtained based on the best information available on assumptions used by market participants in pricing the relevant asset or liability.

② Fair value hierarchy

This company divides the input value used in fair value measurement into three levels, and first uses the first level input value, then uses the second level input value, and finally uses the third level input value. First level: quotation of same assets or liabilities in an active market (unadjusted) The second level input value is a directly or indirectly observable input value of the asset or liability in addition to the first level input value. The input value of the third level is the unobservable input value of the related asset or liability.

(2) Hedge accounting

(2.1) Classification of inventories

The Company's hedge is a cash flow hedge.

Cash flow hedging refers to the hedging of cash flow risk. The change in cash flow is derived from specific risks associated with recognized assets or liabilities, expected transactions that are likely to occur, or with respect to the components of the above-mentioned project and will affect the profits and losses of the enterprise.

(2.2) Hedging tools and hedged projects

Hedging means a financial instrument designated by the Company for the purpose of hedging, whose fair value or cash flow variation is expected to offset the fair value or cash flow variation of the hedged item, including:

① Financial liabilities measured at fair value with variations accounted into current income account Check-out options can only be used as a hedging tool if the option is hedged, including those embedded in a hybrid contract. Derivatives embedded in a hybrid contract but not split cannot be used as separate hedging tools.

② Non-derivative financial assets or non-derivative financial liabilities that are measured at fair value and whose changes are included in the current profit and loss, but designated as fair value and whose changes are included in the current profit and loss, and their own credit risk changes caused by changes in fair value except for financial liabilities included in other comprehensive income.

Own equity instruments are not financial assets or financial liabilities and cannot be used as hedging instruments.

A hedged item refers to an item that exposes the Company to the risk of changes in fair value or cash flow and is designated as the hedged object and can be reliably measured. The Company designates the following individual projects, project portfolios or their components as hedged projects:

① Confirmed assets or liabilities.

② Confirmed commitments that have not yet been confirmed. Confirmed commitment refers to a legally binding agreement to exchange a specific amount of resources at an agreed price on a specific date or period in the future.

③ Expected transactions that are likely to occur. Anticipated transactions refer to transactions that have not yet been committed but are expected to occur.

④ Net investment in overseas operations.

The above-mentioned project components refer to the parts that are less than the overall fair value or cash flow changes of the project. The Company designates the following project components or their combinations as hedged items:

① The part of the change in fair value or cash flow (risk component) that is only caused by one or more specific risks in the overall fair value or cash flow changes of the project. According to the assessment in a specific market environment, the risk component should be able to be individually identified and reliably measured. The risk component also includes the part where the fair value or cash flow of the hedged item changes only above or below a specific price or other variables.

② One or more selected contractual cash flows.

③ The component of the nominal amount of the project, that is, the specific part of the whole amount or quantity of the project, may be a certain proportion of the whole project, or may be a certain level of the whole

project. If a certain level includes early repayment rights and the fair value of the early repayment rights is affected by changes in the risk of the hedge, the level shall not be designated as the hedged item of the fair value hedge, but in the measurement of the hedged item except when the fair value has included the influence of the prepayment right.

(2.3) Evaluation of hedging relationship

When the hedging relationship is initially specified, the Group officially specifies the related hedging relationships with official documents recording the hedging relationships, risk management targets and hedging strategies. This document sets out the hedging tools, hedged items, the nature of hedged risks, and the Company's assessment of hedged effectiveness. Hedging means a financial instrument designated by the Company for the purpose of hedging, whose fair value or cash flow variation is offset the fair value or cash flow variation of the hedged item, including: Such hedges are continuously evaluated on and after the initial specified date to meet the requirements for hedging validity.

If the hedging instrument has expired, been sold, the contract is terminated or exercised (but the extension or replacement as part of the hedging strategy is not treated as expired or contract termination), or the risk management objective changes, resulting in hedging The relationship no longer meets the risk management objectives, or the economic relationship between the hedged item and the hedging instrument no longer exists, or the impact of credit risk begins to dominate in the value changes caused by the economic relationship between the hedged item and the hedging instrument, or when the hedge no longer meets the other conditions of the hedge accounting method, the Company terminates the use of hedge accounting.

If the hedging relationship no longer meets the requirements for hedging effectiveness due to the hedging ratio, but the risk management objective of the designated hedging relationship has not changed, the Company shall rebalance the hedging relationship.

(2.4) Validation and measurement

If the strict conditions of the hedging accounting method are satisfied, the following methods shall be applied:

Cash flow hedging

The part of hedging tool gains or losses that is valid for hedging is recognized as other comprehensive income as a cash flow hedging reserve, and the part that is invalid for hedging (that is, other gains or losses after deducting other comprehensive income), are counted Into the current profit and loss. The amount of cash flow hedging reserve is determined according to the lower of the absolute amounts of the following two items: ①accumulated gains or losses of hedging instruments since the hedging. The amount in the effective arbitrage is recognized by the accumulative gains or losses from the starting of arbitrage and accumulative changes to the current value of future forecast cash flows from the start of arbitrage.

If the expected transaction of the hedged asset is subsequently recognized as a non-financial asset or non-financial liability, or if the expected transaction of the non-financial asset or non-financial liability forms a defined commitment to the applicable fair value hedge accounting, the amount of the cash flow hedge reserve originally recognized in the other consolidated income is transferred out to account for the initial recognized amount of the asset or liability. For the remaining cash flow hedges, during the same period when the expected cash flow to be hedged affects the profit and loss, if the expected sales occur, the cash flow hedge reserve recognized in other comprehensive income is transferred out and included in the current profit and loss.

(3) Repurchase of the Company's shares

(3.1) In the event of a reduction in the Company's share capital as approved by legal procedure, the Company shall reduce the share capital by the total amount of the written-off shares, adjust the owner's equity by the difference between the price paid by the purchased stocks (including transaction costs) and the total amount of the written-off shares, offset the capital reserve (share capital

premium), surplus reserve and undistributed profits in turn; A portion of a capital reserve (share capital premium) that is less than the total face value and less than the total face value.

(3.2) The total expenditure of the repurchase shares of the Company, which is managed as an inventory share before they are cancelled or transferred, is converted to the cost of the inventory shares.

(3.3) Increase in the capital reserve (capital premium) at the time of transfer of an inventory unit, the portion of the transfer income above the cost of the inventory unit; Lower than the inventory stock cost, the capital reserve (share capital premium), surplus reserve, undistributed profits in turn.

(4) Significant accounting judgment and estimate

The Group continuously reviews significant accounting judgment and estimate adopted for the reasonable forecast of future events based on its historical experience and other factors. Significant accounting judgment and assumptions that may lead to major adjustment of the book value of assets and liabilities in the next accounting year are listed as follows:

Classification of financial assets

The major judgements involved in the classification of financial assets include the analysis of business model and contract cash flow characteristics.

The Group determines the business mode of managing financial assets at the level of financial asset portfolio, taking into account such factors as how to evaluate and report financial asset performance to key managers, the risks that affect financial asset performance and how to manage it, and how to obtain remuneration for related business managers.

When the Group assesses whether the contractual cash flow of financial assets is consistent with the basic borrowing arrangement, there are the following main judgments: whether the principal may change due to early repayment and other reasons during the duration of the period or the amount of change; whether the interest including the time value of money, credit risk, other basic borrowing risks, and consideration of costs and profits. For example, does the amount paid in advance reflect only the unpaid principal and the interest based on the unpaid principal, as well as the reasonable compensation paid for early termination of the contract.

Measurement of expected credit losses of accounts receivable

The Group calculates the expected credit loss of accounts receivable through the risk exposure of accounts receivable default and the expected credit loss rate, and determines the expected credit loss rate based on the default probability and the default loss rate. When determining the expected credit loss rate, the Company uses internal historical credit loss experience and other data, combined with current conditions and forward-looking information to adjust the historical data. When considering forward-looking information, the indicators used by the Company include the risks of economic downturn, changes in the external market environment, technological environment, and customer conditions. The Company regularly monitors and reviews assumptions related to the calculation of expected credit losses.

Deferred income tax assets

If there is adequate taxable profit to deduct the loss, the deferred income tax assets should be recognized by all the unused tax loss. This requires the management to make a lot of judgment to forecast the time and amount of future taxable profit and determine the amount of the deferred tax assets based on the taxation strategy.

Revenue recognition (after January 1, 2020)

The Group's revenue from providing curtain wall construction and metro platform screen door installation services is recognized over a period of time. The recognition of the income and profit of such engineering installation services depends on the Company's estimation of the contract results and performance progress. If the actual amount of total revenue and total cost is higher or lower than the estimated value of the management, it will affect the amount of revenue and profit recognition of the Group in the future.

Estimate of fair value

The Group uses fair value to measure investment real estate and needs to estimate the fair value of investment real estate at least quarterly. This requires the management to reasonably estimate the fair value of the investment real estate with the help of valuation experts.

Development cost

For property that has been handed over with income recognized, but whose public facilities have not been constructed or not been completed, the management will estimate the development cost for the part that has not been started according to the budget to reflect the operation result of the property sales.

35. Major changes in accounting policies and estimates

(1) Changes in accounting policies

√ Applicable □ Inapplicable

Account policy changes and reasons	Approval procedure	Remarks
In December 2018, the Ministry of Finance revised and issued the accounting standards for Business Enterprises No. 21 - leasing (CK [2018] No. 35) (hereinafter referred to as the "new leasing standards"), which requires enterprises listed at home and abroad and enterprises listed abroad and preparing financial statements using international financial reporting standards or accounting standards for enterprises to take effect as of January 1, 2019; Other enterprises implementing the accounting standards for business enterprises shall be implemented as of January 1, 2021. According to the above unified requirements, the Company needs to make corresponding changes to the original accounting policies.	Inapplicable	Disclosure source: Announcement on Changes in Accounting Policies on March 23, 2021 (http://www.cninfo.com.cn/) on http://www.cninfo.com.cn/

According to the requirements of the new lease standard, the Company will recognize all leased assets (except short-term leases and low-value asset leases that choose simplified processing) to recognize right-of-use assets and lease liabilities from January 1, 2021, and recognize depreciation and interest expenses respectively.

In the standard convergence policy, simplified treatment is selected, that is, the lease liabilities are equal to the present value of the remaining lease payment, and the right-of-use asset is equal to the amount of the lease liabilities and necessary adjustments are made. Using this method will not affect the Company's retained earnings at the beginning of 2021.

Due to the implementation of the new lease standards, the consolidated statements of the Company adjusted the use right assets of RMB7,208,915.40 yuan, lease liabilities of RMB5,102,002.19 yuan and non-current liabilities due within one year of RMB2,106,913.21 yuan on January 1, 2021.

At the same time, due to the implementation of the new lease standard, there is no impact on the financial statements of the parent company of the Company.

Total	24,619,179.70	5,102,002.19

37. Anticipated liabilities

In RMB

Item	Closing balance	Opening balance	Reason
Pending lawsuit	25,683,696.08	27,017,023.60	Penalty for delay in handling certificate of title
Product quality warranty	4,316,832.35	6,408,476.53	Product quality warranty
Total	30,000,528.43	33,425,500.13	--

Note: including related significant assumptions and estimates for anticipated liabilities

For details of the matters involved in the litigation of liquidated damages, see description of ③ of XIII. Commitments and contingencies 2. Contingencies (1).

38. Deferred earning

In RMB

Item	Opening balance	Increase	Decrease	Closing balance	Reason
------	-----------------	----------	----------	-----------------	--------

Government subsidy	9,168,492.17		325,310.66	8,843,181.51	See the following table
Total	9,168,492.17		325,310.66	8,843,181.51	--

Items involving government subsidies:

In RMB

Liabilities	Opening balance	Amount of new subsidy	Amount included in non-operating revenue	Other misc. gains recorded in this period	Costs offset in the period	Other change	Closing balance	Related to assets/earning
Railway transport screen door controlling system and information transmission technology	58,749.53			9,452.16			49,297.37	Assets-related
Major investment project prize from Industry and Trade Development Division of Dongguan Finance Bureau	1,566,667.10			28,571.40			1,538,095.70	Assets-related
Distributed PV power generation project subsidy sponsored by Dongguan Reform and Development Commission	368,750.21			12,499.98			356,250.23	Assets-related
Subsidized land transfer	173,553.23			1,862.82			171,690.41	Assets-related
Special subsidy for industrial	800,000.00						800,000.00	Assets-related

transformation, upgrading and development								
Enterprise informationization subsidy project of Shenzhen Small and Medium Enterprise Service Agency	420,000.00			24,000.00			396,000.00	Assets-related
National Industry Revitalization and Technology Renovation Project fund	5,685,712.10			153,864.30			5,531,847.80	Assets-related
Shenzhen Science and Technology Innovation Committee Technology Innovation Subsidy	95,060.00			95,060.00			0.00	Earning-related
Total	9,168,492.17			325,310.66			8,843,181.51	

39. Capital share

In RMB

	Opening balance	Change (+,-)					Closing balance
		Issued new shares	Bonus shares	Transferred from reserves	Others	Subtotal	
Total of capital shares	1,088,278,951.00				-14,404,724.00	-14,404,724.00	1,073,874,227.00

Others:

- ① The decrease in share capital was due to the cancellation of B shares repurchased by the Company during the reporting period.
- ② As of June 30, 2021, there are 2,302,093 shares with limited sales conditions in the closing balance, all of which are held by

senior executives.

40. Capital reserve

In RMB

Item	Opening balance	Increase	Decrease	Closing balance
Capital premium (share capital premium)	19,005,491.05	123,294,737.60	21,542,953.69	123,294,737.60
Other capital reserves	1,454,097.35			1,454,097.35
Total	20,459,588.40	123,294,737.60	21,542,953.69	122,211,372.31

Other note, including explanation about the reason of the change:

The increase of RMB123,294,737.60 yuan in capital reserve in the current period is due to the premium transfer of part of the equity of Zhichuang Technology, a holding subsidiary of the Company; The capital reserve decreased by RMB21,542,953.69 yuan in the current period due to the Company's acquisition of 100% equity of Yunzhu.

41. Shares in stock

In RMB

Item	Opening balance	Increase	Decrease	Closing balance
Shares in stock	42,748,530.12		42,748,530.12	
Total	42,748,530.12		42,748,530.12	

Other note, including explanation about the reason of the change:

At the second meeting of the ninth board of directors held on June 23, 2020, the Company considered and approved the proposal to repurchase part of the Company's domestic listed foreign shares (B shares) in 2020. From July 23, 2020 to September 22, 2020, 14,404,724 shares were repurchased through centralized competitive bidding, the highest price was HK \$3.47/share and the lowest price was HK \$3.16/share. The actual payment was HK \$48,359,819.24 (including transaction costs), which was included in treasury shares of RMB 42,748,530.12. On April 23, 2021, the Company completed the cancellation of the repurchase of 14,404,724 B shares, reduced the share capital of 14,404,724 shares and offset the surplus reserve of RMB28,343,806.12.

42. Other miscellaneous income

In RMB

Item	Opening balance	Amount occurred in the current period						Closing balance
		Amount before income tax	Less: amount written into other gains and transferred into gain/loss in previous terms	Less: amount written into other gains and transferred into gain/loss	Less: Income tax expenses	After-tax amount attributed to the parent	After-tax amount attributed to minority shareholders	

				in previous terms				
1. Other misc. incomes that cannot be re-classified into gain and loss	-11,670,984.54	-229,678.59				-229,678.59		-11,900,663.13
Fair value change of investment in other equity tools	-11,670,984.54	-229,678.59				-229,678.59		-11,900,663.13
2. Other misc. incomes that will be re-classified into gain and loss	13,749,152.17	1,207,423.43	643,973.21		358,625.78	228,217.85	-23,393.41	13,977,370.02
Cash flow hedge reserve	5,150,331.29	-318,749.80	643,973.21		-144,408.45	-785,690.88	-32,623.68	4,364,640.41
Translation difference of foreign exchange statement	-157,732.58	-485,963.69				-495,193.96	9,230.27	-652,926.54
Investment real estate measured at fair value	8,756,553.46	2,012,136.92			503,034.23	1,509,102.69		10,265,656.15
Other miscellaneous income	2,078,167.63	977,744.84	643,973.21		358,625.78	-1,460.74	-23,393.41	2,076,706.89

43. Surplus reserves

In RMB

Item	Opening balance	Increase	Decrease	Closing balance
Statutory surplus reserves	106,783,436.96		106,783,436.96	
Total	106,783,436.96		106,783,436.96	

Note, including explanation about the reason of the change:

If the cost of treasury shares written off in the current period is higher than the corresponding capital stock cost, the surplus reserve of RMB28,343,806.12 yuan is offset at the time of write off; The acquisition of 100% equity of Yunzhu in the current period offset the surplus reserve of RMB78,439,630.84 yuan.

44. Retained profit

In RMB

Item	Current period	Last period
Adjustment on retained profit of previous period	4,215,005,541.52	3,898,626,177.99
Total of retained profit at beginning of year adjusted (+ for increase, - for decrease)	2,521,701.04	9,026,682.67
Retained profit adjusted at beginning of year	4,217,527,242.56	3,907,652,860.66

Plus: Net profit attributable to owners of the parent	111,488,701.33	147,784,781.12
Common share dividend payable		54,413,947.55
Adjustment to consolidation of entities under common control	24,107,813.58	
Closing retained profit	4,304,908,130.31	4,001,023,694.23

Details of retained profit adjusted at beginning of the period

- 1) Retrospective adjustment due to adopting of the Enterprise Accounting Standard and related regulations, included the retained profit by RMB0.
- 2) Variation of accounting policies, influenced the retained profit by RMB0.00.
- 3) Correction of material accounting errors, influenced the retained profit by RMB0.00.
- 4) Change of consolidation range caused by merger of entities under common control, influenced the retained profit by RMB0.
- 5) Other adjustment influenced the retained profit by RMB0.

Information related to performance obligations:

The two businesses of the Company's curtain wall system and materials, subway screen doors and services are mainly the contracts corresponding to the engineering projects. Usually, a contract constitutes a single performance obligation and is a performance obligation performed within a certain period of time. The Company recognizes revenue according to the performance progress.

The sales of photovoltaic power generation products and real estate belong to contracts corresponding to commodity sales. Usually, a contract constitutes a single performance obligation and is a performance obligation at a certain point in time. Revenue is recognized when the customer obtains control of the relevant product.

Information related to the transaction price allocated to the remaining performance obligations:

At the end of the reporting period, the amount of revenue corresponding to the performance obligations that have been signed but have not been performed or completed is RMB5,996,487,536.97 yuan, of which RMB2,009,854,086.60 yuan is expected to be recognized in the second half of 2021, RMB2,926,253,777.06 yuan is expected to be recognized in 2022, and RMB1,060,379,673.31 yuan is expected to be recognized in 2023 and later years.

Other note

The Company must comply with disclosure requirements of the Shenzhen Stock Exchange Industry Information Disclosure Guideline No.3 - Listed Companies Engaged in Property Development.

X. Risks of Financial Tools

The risks associated with the financial instruments of the Company arise from the various financial assets and liabilities recognized by the Company in the course of its operations, including credit risks, liquidity risks and market risks.

The management objectives and policies of various risks related to financial instruments are governed by the management of the Company. The operating management is responsible for daily risk management through functional departments (for example, the Company's credit management department reviews the Company's credit sales on a case-by-case basis). The internal audit department of the Company conducts daily supervision of the implementation of the Company's risk management policies and procedures, and reports relevant findings to the Company's audit committee in a timely manner.

The overall goal of the Company's risk management is to formulate risk management policies that minimize the risks associated with various financial instruments without excessively affecting the Company's competitiveness and resilience.

1. Credit risk

Credit risk is caused by the failure of one party of a financial instrument in performing its obligations, causing the risk of financial loss for the other party. The credit risk of the Company mainly comes from monetary capital, notes receivable, accounts receivable, other receivables, receivables financing, contract assets, etc. The credit risk of these financial assets comes from the default of the counterparties, and the maximum risk exposure is equal to the book amount of these instruments.

The Company's money and funds are mainly deposited in the commercial banks and other financial institutions. The Company believes that these commercial banks have higher reputation and asset status and have lower credit risk.

For notes receivable, accounts receivable, other receivables, receivables financing and contract assets, the Company sets relevant policies to control credit risk exposure. The Group set the credit line and term for debtors according to their financial status, external rating, and possibility of getting third-party guarantee, credit record and other factors. The Group regularly monitors debtors' credit record. For those with poor credit record, the Group will send written payment reminders, shorten or cancel credit term to lower the general credit risk.

(1) Significant increases in credit risk

The credit risk of the financial instrument has not increased significantly since the initial confirmation. In determining whether the credit risk has increased significantly since the initial recognition, the Company considers reasonable and evidenced information, including forward-looking information, that can be obtained without unnecessary additional costs or effort. The Company determines the relative risk of default risk of the financial instrument by comparing the risk of default of the financial instrument on the balance sheet date with the risk of default on the initial recognition date to assess the credit risk of the financial instrument from initial recognition.

When one or more of the following quantitative and qualitative criteria are triggered, the Company believes that the credit risk of financial instruments has increased significantly: the quantitative criteria are mainly the probability of default in the remaining life of the reporting date increased by more than a certain proportion compared with the initial recognition; the qualitative criteria are the major adverse changes in the operation or financial situation of the major debtors, the early warning of customer list, etc.

(2) Definition of assets where credit impairment has occurred

In order to determine whether or not credit impairment occurs, the standard adopted by our company is consistent with the credit risk management target for related financial instruments, and quantitative and qualitative indicators are considered.

Major financial difficulties have occurred to the issuer or the debtor; Breach of contract by the debtor, such as payment of interest or default or overdue of principal; (B) The concession that the debtor would not make under any other circumstances for economic or contractual considerations relating to the financial difficulties of the debtor; The debtor is likely to be bankrupt or undertake other financial restructuring; The financial difficulties of the issuer or debtor lead to the disappearance of the active market for the financial asset; To purchase or generate a financial asset at a substantial discount, which reflects the fact that a credit loss has occurred.

Credit impairment in financial assets may be caused by a combination of multiple events, not necessarily by events that can be identified separately.

(3) Expected credit loss measurement

Depending on whether there is a significant increase in credit risk and whether a credit impairment has occurred, the Company prepares different assets for a 12-month or full expected credit loss. The key parameters of expected credit loss measurement include default probability, default loss rate and default risk exposure. Taking into account the quantitative analysis and forward-looking information of historical statistics (such as counterparty ratings, guaranty methods, collateral categories, repayment methods, etc.), the Company establishes the default probability, default loss rate and default risk exposure model.

Definition:

The probability of default refers to the possibility that the debtor will not be able to fulfil its obligation to pay in the next 12 months or throughout the remaining period.

Breach Loss Rate means the extent of loss expected by the Company for breach risk exposure. Depending on the type of counterparty, the manner and priority of recourse, and the different collateral, the default loss rate is also different. The default loss rate is the percentage of the risk exposure loss at the time of the default, calculated on the basis of the next 12 months or the entire lifetime.

Exposure to default is the amount payable to the Company at the time of default in the next 12 months or throughout the remaining life. Prospective information credit risks significantly increased and expected credit losses were calculated. Through the analysis of historical data, the Company has identified the key economic indexes that affect the credit risk of each business type and the expected credit loss.

The largest credit risk facing the Group is the book value of each financial asset on the balance sheet. The Group makes no guarantee that may cause the Group credit risks.

Among the Group's receivables, accounts receivable from top 5 customers account for 31.97% of the total accounts receivable (beginning of the period: 28.36%); among other receivables, other receivables from top 5 customers account for 68.32% of the total other receivables (beginning of the period: 69.65%).

2. Liquidity risk

Liquidity risk is the risk of capital shortage when the Group needs to pay cash or settled with other financial assets. The Company is responsible for the cash management of its subsidiaries, including short-term investments in cash surpluses and loans to meet projected cash requirements. The Company's policy is to regularly monitor short and long-term liquidity requirements and compliance with borrowing agreements to ensure adequate cash reserves and readily available securities.

As of June 30, 2021, the maturity of the Company's financial liabilities is as follows:

Contract amount: RMB

Item	June 30, 2021			
	Less than 1 year	Within 1-3 years	Over 3 years	Total
Short-term loans	117,463.12			117,463.12

Total liabilities	353,292.98	32,178.03	86,760.17	472,231.18

3. Market risks and measures

(1) Credit risks

The exchange rate risk of the Company mainly comes from the assets and liabilities of the Company and its subsidiaries in foreign currency not denominated in its functional currency. Except for the use of Hong Kong dollars, United States dollars, Australian dollars, Vietnamese dong, euro, Indian rupees or Singapore currencies

by its subsidiaries established in and outside the Hong Kong Special Administrative Region, other major businesses of the Company shall be denominated in Renminbi.

As of June 30, 2021, the Company's ending foreign currency financial assets and foreign currency financial liabilities are listed in Note 7, 66 foreign currency monetary item description.

The Company pays close attention to the impact of exchange rate changes on the Company's exchange rate risk. The Company continuously monitors the scale of foreign currency transactions and foreign currency assets and liabilities to minimize foreign exchange risks. To this end, the Company may avoid foreign exchange risks by signing forward foreign exchange contracts or currency swap contracts.

(2) Interest risk

The Group's interest rate risk mainly arises from long-term interest-bearing debts such as long-term bank loans. Financial liabilities with floating interest rate cause cash flow interest rate risk for the Group. Financial liabilities with fixed interest rate cause fair value interest rate risk for the Group. The Group decides the proportion between fixed interest rate and floating interest rate according to the market environment and regularly reviews and monitors the combination of fixed and floating interest rate instruments.

The Group Finance Department of the Company continuously monitors the Group interest rate level. The rising interest rate will increase the cost of the new interest-bearing debt and the interest expenditure on interest-bearing debt which has not yet been paid by the Company at the floating rate, and will have a significant adverse effect on the Company's financial performance. Management will make adjustments in time according to the latest market conditions.

As of June 30, 2021, the current floating rate loan is RMB 2.077 billion. If the loan interest rate calculated by floating rate increases or decreases by 50 basis points, the net profit of the Company will decrease or increase by RMB 7.7888 million (December 31, 2020: RMB 7.3875 million) while other risk variables remain unchanged.

XI. Fair Value

1. Closing fair value of assets and liabilities measured at fair value

In RMB

Item	Closing fair value			
	First level fair value	Second level fair value	Third level fair value	Total
1. Continuous fair value measurement	--	--	--	--
Derivative financial assets	5,096,490.27			5,096,490.27
Investment in other equity tools			17,398,629.00	17,398,629.00
Leased building		5,635,833,581.39		5,635,833,581.39
Financial assets measured at fair value with changes included in current profits			132,493,708.09	132,493,708.09

and losses -- investment in financial products				
Receivable financing			23,798,104.10	23,798,104.10
Other non-current financial assets			5,198,015.90	5,198,015.90
Total assets measured at fair value continuously	5,096,490.27	5,635,833,581.39	178,888,457.09	5,819,818,528.75
2. Discontinuous fair value measurement	--	--	--	--

2. Recognition basis of market value of continuous and discontinuous items measured at first level fair value

The Group determines the fair value using quotation in an active market for financial instruments traded in an active market;

3. Valuation technique and qualitative and quantitative information for key parameters of continuous and discontinuous second level fair value items

For investment real estate, the Company adopts valuation technology to determine its fair value. The valuation techniques adopted are mainly the market comparison method and the income method, and the rent and resale model. The input value of valuation technology mainly includes comparable market unit price, market rent, vacancy rate, growth rate, rate of return, etc.

4. Valuation technique and qualitative and quantitative information for key parameters of continuous and discontinuous third level fair value items

If there is no active market, the Company uses evaluation techniques to determine the fair value. The valuation models are mainly cash flow discount model and market comparable company model. The input value of valuation technology mainly includes risk-free interest rate, benchmark interest rate, exchange rate, credit point difference, liquidity premium, lack of liquidity discount, etc.

5. Switch between different levels, switch reason and switching time policy

The Company takes the occurrence date of the events leading to the transition between levels as the time point to confirm the transition between levels. In the period, there is no switch in the financial assets measured at fair value between the first and second level or transfer in or out of the third level.

6. Fair value of financial assets and liabilities not measured at fair value

Financial assets and liabilities measured at amortized cost include: monetary capital, bills receivable, accounts receivable, other receivables, short-term borrowings, notes payable, employee compensation payable, accounts payables, other payables, and long-term payables.

XII. Related Parties and Transactions

XIII. Contingent events

1. Major commitments

Major commitments that exist on the balance sheet day

On November 6, 2017, Fangda Real Estate Co., Ltd., a subsidiary of the Company, and Bangshen Electronics (Shenzhen) Co., Ltd. signed the "Joint Development Agreement on Fangda Bangshen Industrial Park (Temporary Name) Urban Renewal Project", and the two parties agreed to develop cooperatively. In order to develop urban renewing projects such as a "renovation project", Fangda Real Estate provided Party A with property compensation through renovating and renovating the property allocation terms agreed upon by both parties, and obtained independent development rights of the project. As of June 30, 2021, Fangda Real Estate Co., Ltd. had paid a security deposit of RMB 20 million.

(2) In July 2018, the Company's subsidiary Fangda Real Estate Co. Ltd. (Party A) signed a contract with Shenzhen Yikang Real Estate Co. Ltd. (Party B1) and Shenzhen Qianhai Zhongzheng Dingfeng No. 6 Investment Enterprise (Limited Partnership) (Party B2), "Shenzhen Henggang Dakang Village Project Cooperation Agreement". Party B agrees to transfer the entire equity of the project company it holds and the entire development interest of the project to Party A. Party A shall pay Party B a total of RMB600 million for the cooperation price. As of June 30, 2021, Fangda Real Estate has paid RMB 50 million yuan of deposit and RMB 61.9372 million yuan of equity transfer to Party B; Pay the service fee, deposit, preliminary willingness collection fee and the down payment of the old chicken farm on behalf of the project company, totaling about RMB90 million yuan.

As of June 30, 2021, the Group did not have other commitments that should be disclosed.

2. Contingencies

(1) Significant contingencies on the balance sheet date

(1) Contingent liabilities formed by material lawsuit or arbitration, and their influences on the financial position

① In November 2018, Fangda Jianke a subsidiary of the Group sued Fujian Huapu Real Estate Development Co. Ltd. for a payment of RMB 13810243.67 and its overdue interest of RMB 373,380.16 totaling RMB 14,183,623.83 to the Taijiang District People's Court of Fuzhou City. The case has not been decided. On 10 May 2019, the court ruled against the prosecution; On 16 May 2019, Fang Da Jianke filed an appeal; On 26 August 2019, the court of second instance ordered the court of first instance to revoke the first instance decision; On 8 October 2019, it was sent back to the court of first instance, case number: (2019) Min 0103 Republic of China 4282. In April 2020, Huapu Company filed a counterclaim application to the court, requesting Fangda Jianke Company to pay a total of RMB12,746,000.00 for the construction period and quality. The first instance has not yet been decided. Fujian Huapu Real Estate Development Co., Ltd. has been applied for bankruptcy liquidation by other creditors, and Fangda Jianke has declared its creditor's rights to the manager. As of the date of this report, the case is still under trial.

② On June 19, 2019, Langfang Aomei Jiye Real Estate Development Co., Ltd. filed a lawsuit against Fangda Jianke in the People's Court of Langfang Development Zone, demanding compensation of RMB19,721,315.00, and filed an application for appraisal of quality, repair cost and uncompleted project cost on December 26, 2019; Fangda Jianke filed a counterclaim on September 11, 2019, demanding payment of RMB13,920,000.70, and put forward the application for completed project cost appraisal on November 22, 2019. As of the date of this report, the case is still in the process of first instance.

③ As of December 31, 2021, due to the expiration of the implementation rules of the "Shenzhen Municipal People's Government on the Administration of the Transfer of Industrial Buildings (Trial)" and the "Notice of the Municipal Planning and

Land Resources Commission on Matters Related to the Management of Industrial Building Transfers" and other reasons, some owners of Fangda Town failed to handle the real estate ownership certificate as scheduled and could not handle the certificate until the implementation of the new policy in February 2020. Both parties had disputes over the failure to handle the certificate. As a result of the above-mentioned litigation, the owners proposed property preservation, and the monetary fund of RMB35,956,145.59 of Fangda Real Estate was frozen. As of June 30, 2021, Fangda Real Estate has accrued estimated liabilities of RMB25,683,696.08 yuan according to the most likely litigation results.

(2) Pending major lawsuits

On September 6, 2017, Chenghua District People's Court of Chengdu Municipality sentenced Sichuan Chuta Hengyuan Industrial Co., Ltd. to pay construction money to Fangda Jianke within 10 days from the date of the verdict 川0108民初1828号 RMB10,242,182.99. As of the date of this report, Fangda Jianke has applied for execution and has not received the relevant payment.

On September 10, 2018, the People's Court of Lixia District of Jinan City sentenced Shandong Zhonghong Real Estate Co. Ltd. to the Company for payment of RMB5960429.45 within 10 days from the date of the effective date of the (2018) Lu 0102 Minchu 5367 civil judgment. Shandong Zhonghong Real Estate Co., Ltd. has been applied for bankruptcy liquidation and its assets have been successfully auctioned. Fangda Construction Technology Co., Ltd. has declared its creditor's rights and enjoys the priority to be paid for the project price. The manager is formulating the distribution details. As of the date of this report, no relevant payment has been received.

On November 15, 2019, the Chengdu Chenghua District People's Court ruled (2019) Chuan 0108 Min Chu No. 428 that Sichuan Chuanta Hengyuan Industrial Co., Ltd. shall pay interest to the Company within ten days from the effective date of the judgment (subject to RMB6,013, 841.233 as the base, from May 29, 2015 to the day when the payment is paid; with RMB841,876. 3235 as the base, from May 28, 2015 to the day when the payment is paid. Based on RMB841, 876.3235, from May 28, 2016 to the day when the payment is paid). The Company enjoys the priority of compensation for the discounted or auctioned price of Building C of the Chuan Tower supporting project (Film and Television Cultural Square) project within the scope of RMB 7,697,593.88. As of the date of this report, Fangda Jianke has applied for execution and has not received the relevant payment.

(3) Contingent liabilities formed by providing of guarantee to other companies' debts and their influences on financial situation

As of June 30, 2021, the Company provided guarantees for the following unit loans:

Name of guaranteed entity	Guarantee	Amount (RMB10, 000)	Term
Fangda Zhijian	Guarantee and mortgage guarantee	123.78	2019/7/31 to 2024/7/10

XIV. Post-balance-sheet events**1. Profit distribution**

In RMB

Profit or dividend to be distributed	0.00
Profit or dividend approved to be distributed	0.00

2. Notes to other issues in post balance sheet period

The Company has no other issues in post balance sheet period that need to be disclosed on Monday, August 16, 2021 (report date approved by the Board of Directors).

XV. Other material events**1. Suspension of operations**

There is no net profit from discontinued operations in the current period.

2. Segment information**(1) Recognition basis and accounting policy for segment report**

The Group divides its businesses into five reporting segments. The reporting segments are determined based on financial information required by routine internal management. The Group's management regularly review the operating results of the reporting segments to determine resource distribution and evaluate their performance.

The reporting segments are:

(1) Curtain wall segment, production and sales of curtain wall materials, construction curtain wall design, production and installation;

(2) Rail transport segment: assembly and processing of metro screen doors;

(3) Real estate segment: development and operating of real estate on land of which land use right is legally obtained by the Company; property management;

(4) New energy segment: photovoltaic power generation, photovoltaic power plant sales, photovoltaic equipment R & D, installation, and sales, and photovoltaic power plant engineering design and installation

(5) Others

The segment report information is disclosed based on the accounting policies and measurement standards used by the segments when reporting to the management. The policies and standards should be consistent with those used in preparing the financial statement.
